1. Introduction

The Ministry of Education of Ethiopia has announced the implementation of exit exam for all undergraduate program students (public and private), beginning with the 2022/2023 academic year, in order to improve the quality of graduates produced by higher learning institutions. The exit exam aimed at checking whether students have acquired the required knowledge, skills and attitudes or not. To implement this, it requires determining competency areas for a specific program, which is already completed. Based on the competency areas prepared, it needs to plan the construction of tests.

Planning of a test is a first and vital step in the construction of an achievement test. An achievement test demands very systematic and careful planning, as a fact that good planning is a symbol of success. Tests are the tools that provide scores that measure level of student learning and study program learning outcomes. In order to achieve the valid and reliable measurement of student learning and program learning outcomes, the development of valid and reliable test is the mandatory. Test should be able to measure student performance in all dimensions of knowledge, skill and attitude. The carefully planned test construction contributes to improve the overall quality of the test in terms of test content validity, difficulty level, discrimination power and test reliability. Test preparation is not an easy task; it requires a careful planning and guideline to make the task simple. Test construction needs the preparation of test blue print. Test blueprint is defined as a complete plan that explains how to develop a test. The term refers to a map or specification of assessment to ensure that all aspects of the curriculum and educational domains are covered by the assessment programs over a specified period of time. It helps curriculum developers/test constructors to match various competencies with the course content and the appropriate modality of assessment.

Generally, test blueprint will help to ensure tests: 1) Appropriately assess the achievement of instructional objectives of the course; 2) Appropriately reflect key course goals, objectives and the material learned or covered during the instruction period; and 3) Include the appropriate item formats along with the knowledge and skills being assessed.

Keeping this in mind, the team has prepared this test blueprint document in order to help the test developers or content specialists in their process of valid and reliable test construction. The major points considered in the process of preparing this test blue print guideline were the core competencies that have been already identified for the themes of courses, the course contents, course credit hours, and the learning outcomes with their corresponding levels of achievement by learning domains. In line with these, the number of test items that should adequately assess the performance of students in all the content topics will be determined through discussion with the content specialists who construct the blueprint and test for their corresponding study program.

Therefore, the main purpose of this manual is to give direction on how to develop blueprint for content specialists so that they can develop a test blueprint for their respective program.

2. Objective of test blueprint

Test blueprint preparation is generally opted to assist the preparation of a test that is representative, broadly sampled, and consisting of complete knowledge domain expected of the Ethiopian higher education students on completion of their study program. The specific objectives of test blueprint are to:

- Facilitate the construction of a representative and balanced test items for the selected courses in accordance with the competencies identified.
- Guide test developers or writers to write or set appropriate test items.

3. Expected profile of the Graduates

The program is aimed at producing graduates that can have adequate knowledge, skills and attitude towards application of management concepts. Specifically:

- Capable of making rational decisions to solve organizational problems and manage conflicts.
- Capable to manage human resources of an organization competently by understanding individual differences, group behavior and organization level behavior.
- Motivated for creativity, innovation and management of projects.
- Design appropriate and robust strategies to shape or cope up with changing organizational environment.
- Capable of planning, organizing, directing and controlling the activities of all types of organizations.
- Responsive and effective in working with and through others by developing an understanding of common goal.
- Manage material resources and operations of an organization.
- Conduct research and consultancy service in management and related areas and offer training for those who are in need of it.
- Manage financial resources of the organization by applying financial principles.
- Capable of using decision-making models in organizational decision-making.
- Capable of understanding the legal, social and ethical responsibilities associated with the management of all types of organization.
- Capable of using information communication technology in utilizing and managing organizational resources.
- Analyze transaction, summarize, record and interpret accounting data for managerial decision-making.
- Apply fundamental marketing concepts and marketing management approaches in domestic as well as international marketing issues and practices.
- Capable of collecting, analyzing and interpreting statistical data using various statistical tools for managerial decisions.

4. General Objective

Through its programs the department has the objectives of producing:

- Professionals who are capable of planning, organizing, directing and controlling activities of private, non-government and government organizations.
- Professionals who can competently manage marketing, finance operations, human resource, materials, information resources etc.
- Professionals who are responsive and effective in working with and through others as well as capable of making and implementing decisions.
- Professionals capable of searching and developing opportunities as well as tackling problems
- Professionals who are able to face the challenges of today's and tomorrow's highly complex and competitive environment.

5. Specific Objectives

- Describe the basic concepts, the nature, principles, functions and practices of management.
- Describe basic concepts of project planning and analysis.
- Explain the basic concepts, principles and practices associated with formulation and implementation of appropriate and robust strategies to shape or cope up with changing organizational environment.
- Comprehend the concepts, techniques and applications of materials, production and operations management.
- Understand financial resource acquisition and their effective utilization in managing an organization.
 - Ability to make rational decision by understanding decision-making process, and different classifications of decision-making settings and environments.
 - Capable of competently manage Human resource through understanding major principles and techniques of Human resource management system.
 - Develop skills in communicating, influencing and negotiating with peers, subordinates and senior managers in an organization.
 - Design an effective business model/plan and explain the concept, components and importance of creativity and innovation in organizations.
 - Capable of identifying types of data, data collection methods, analyzing and interpreting data using various statistical tools for managerial decisions.
 - Perform various quantitative analysis techniques and tools for supporting managerial decisions.
 - Capable of using information communication technology in utilizing and managing organizational resources.
 - Apply fundamental marketing concepts and marketing management approaches in domestic as well as international markets.
 - Responsive in managing conflict through understanding the concept, nature, types, causes of conflict and Distinguish among different types of conflict management strategies in organizations.

- Responsive and effective in explaining, predicting, influencing and managing human behavior when working with and through others in the organization.
- Appreciate the legal, social and ethical responsibilities of an organization to address the need of various stakeholders.

Theme Two Human Resource and Organizational Behaviour Share = 21 items from the total	Human Resource Management	3	8%	Capable of competently manage Human resource through understanding major principles and techniques of Human resource management system.	CH 1: An Over View Human Resource Management		- Understand the operative functions of Human resource management - Recognize the importance and significance of human resource as an asset											
					CH 2: Human Resource Management Environments	1	Recognize the environmental influence experiencing human resource and deal with these factors		1						1			1
					CH 3: Job Analysis & Human Resource Planning	1	Acquire a broader perspective on managing human resource effectively.								0	1		1
					CH 4: Recruitment & Selection	1								0		1	1	

					CH 5: Training and Development	1	• Apply major principles and techniques of human resource management system • Understand the dynamic nature and applications of human resource management in business and other organizations • Understand human resource handling mechanism			1				1			1
					CH 6: Performance Appraisal	1						1		1			1
					CH 7: Compensation	1			1					1			1
					CH 8: Integration and Maintenance	1		1						1			1
					CH 9: Promotions, Transfers and Separation	1								0		1	1
	Organization al Behaviour	3	7%	Responsive and effective in explaining, predicting, influencing and managing human behaviour when working with and through others in the organization .	CH 1: An Over View of Organizational Behaviour	1	• Understand the core management principles in organization behavior. • Understand how cognitive, behavioral, and emotional outcomes contribute to and sustain organizations.		1					1			1
					CH 2: Foundation of Individual Behaviour and Learning in an Organization	1	• Realize how individual differences in personality, attitudes, emotions, and perceptions influence behaviour in organizations.							0	1		1
					CH 3: Foundation of Group Behaviour	1	• List the stages of group formation • Identify the characteristics of effective group	1						1			1
					CH 4: Concepts of Motivation and Their Applications	1	• Discuss theories of motivation		1					1			1
					CH 7: Culture and Diversity	1	• Successfully manage diversity in organizations. • Discuss organizational norms and how does organizational culture affect behavior in organizations.							0	1		1

					CH 8: Power and Politics in an Organization	1	Understand the impact of organizational politics, and power on behavior in organizations.		1					1			1
					CH 9: Organizational Design and Structure	1	Know how communication affects organizational processes and what makes for effective communication							0		1	1
	Leadership and Change Management	3	6%	Develop skills in communicating, influencing and negotiating with peers, subordinates and senior managers in an organization	CH 1: Introduction to Leadership	1	- Define what leadership is and how it is applied at all levels of management - Understand the basics of leadership		1					1			1
					CH 2: Leadership Theories and Styles	2	- Develop skills in communicating, influencing and negotiating with peers, subordinates and senior managers. - Become adept at assessing leadership traits and qualities in ourselves and others			1				1		1	2
					CH 3: Overview of Change Management	1	- Assist organizations in changing their organization to accommodate the changing world. - Apply orthodox and critical analyses to the management of people and change			1				1			1
					CH 4: Types of Change	1	- Assist organizations in changing their organization to accommodate the changing world. - Create an environment for life time learning			1				1			1

				Responsive in managing conflict through understanding the concept, nature, types, causes of conflict and Distinguish among different types of conflict management strategies in organizations.	CH 5: Conflicts and Conflict Management	1	• Manage conflicts that may arise during changes and internalize the changes made			1					1			1
Total Credit for Theme 2		9	21%			21		2	7	4	0	1	0	14	3	4	21	
Theme Three Innovation, Strategy and Project Management Share = 22 items from the total	Entrepreneurship	3	6%	Design an effective business model/plan and explain the concept, components and importance of creativity and innovation in	CH 1: The Nature of Entrepreneurship	1	• Define entrepreneurship within the context of society; organizations and individuals. • Develop elements of the entrepreneurial mindset and discussing the implications for functioning as a successful entrepreneur		1					1			1	
					CH 2: Business Planning	1	• Overcome obstacles to creative problem-solving. • Prepare an effective business model/plan.						0		1	1		

				organization s.	CH 3: Business Formation	1	• Employ the leadership studies of entrepreneurs who have been successful in different sectors (e.g., start-ups, corporations, Community, public sector, etc.). • Apply specific management issues involved in setting up and running a business enterprise.			1					1			1
				CH 4: Product/Service Development	1	• Developing a concept for an innovative idea, product or service in one’s own area of interest.						1	1			1		
				CH 5: Marketing	1	• Develop market and new venture						1	1			1		
				Appreciate the legal, social and ethical responsibilities of an organization to address the need of various stakeholders .	CH 7: Managing Growth and Transition	1	• Develop a personal framework for managing the ethical dilemmas and social responsibilities facing entrepreneurs.							0	1		1	
	Management information systems	3	4%	Capable of using information communication technology in utilizing and managing organizational resources.	CH 1: Introduction to MIS	1	• Understand and recognize the relationship between information and decision making, • Know significance of information and information systems as basic resources from managerial perspective in decision-making. • Appreciate the ability and skills to identify their information needs, source and		1					1			1	
					CH 4: Common Business Applications of Information Technology	1				1				1			1	
					CH 5: Knowledge Management (KM)	1								0		1	1	

					CH 6: Ethical and Security Issues	1	to utilize the information efficiently and effectively.							0		1	1
	Strategic Management	3	6%	Explain the basic concepts, principles and practices associated with formulation and implementation of appropriate and robust strategies to shape or cope up with changing organizational environment .	CH 1: Introduction to Strategic Management	1	- Understand the strategic decisions that organizations make and have an ability to engage in strategic planning. - Explain the basic concepts, principles and practices associated with strategy formulation and implementation. - Integrate and apply knowledge gained in basic courses to the formulation and implementation of strategy from holistic and multi-functional perspectives. - Analyse and evaluate real life company situations to develop creative solutions, using a strategic management perspective. - Conduct and present a credible business analysis in a team setting. - Understand the crucially important role of strategic management for competitive advantages of business organizations	1						1			1
					CH 2: Mission, Objectives and Goals	1								0		1	1
					CH 3: Environmental Analysis and Appraisal	1					1			1			1
					CH 4: Strategy Formulation	1				1				1			1
					CH 5: Strategy Implementation	1							1	1			1
					CH 6: Strategic Evaluation and Control	1						1		1			1
	Project Management	3	6%	Describe basic concepts of project	CH 1: Introduction to Project Management	1	• Know basic concepts of project analysis and planning	1						1			1
					CH 3: Project Identification	1	• Understand sources of project ideas and project identification,	1						1			1

				planning and analysis.	CH 4: Project Preparation	2	• Explain feasibility study from different analytical perspective, • Conduct project appraisals and make documentation of it.				1				1		1	2
					CH 5: Project Implementation, Monitoring and Evaluation	1	• Appreciate project implementation, controlling & evaluation techniques					1			1			1
					CH 7: Project Financing	1	• Know mechanisms of project financing			1					1			1
Total Credit for Theme 3		12	0.22			22		1	4	4	2	2	3	16	1	5	22	
Theme Four Managerial Statistics and Business Research Share = 15 items from the total	Business Research Methods	3	7%	Perform various quantitative analysis techniques and tools for supporting managerial decisions.	CH 1: An Introduction to Research Methods	1	• Understand the role of business research • Differentiate the different types of research		1					1			1	
					CH 2: Defining Research Problem and Hypothesis Formulation	1	Identify research problem					1	1			1		
					CH 3: Research Proposal	1	Develop appropriate research design						1	1			1	
					CH 4: Research Design (Planning of Research Project)	1	Develop sampling design						1	1			1	
					CH 5: Sources and Methods of Data Collections	1	Differentiate types of data and instrument of data gathering methods				1			1			1	
					CH 6: Data Analysis & Interpretation	1	Analyze and interpret data				1			1			1	
					CH 7: Research Report Writing	1	Prepare standard research project						1	1			1	
	Statistics for Management I	3	4%	Capable of identifying types of data, data collection methods,	CH 1: An Introduction to Business Statistics	1	• Familiarizes students with basic concepts of statistics • Apply statistical tools in managerial decision-making.		1					1			1	
					CH 3: Measures of Central Tendency and Dispersion	1							0		1	1		
					CH 4: Probability Theory	1			1				1			1		

				analysing and interpreting data using various statistical tools for managerial decisions.	CH 5: Probability Distribution	1									0		1	1
	Statistics for Management II	3	4%	Perform various quantitative analysis techniques and tools for supporting managerial decisions.	CH 1: Sampling and Sampling Distributions	1	• Apply various statistical tools for decision making • Make valid inference from data • Construct and test different types of hypothesis • Apply statistical tests in the preparation of Research report. • Find correlation between variables								0		1	1
					CH 3: Hypothesis Testing	1								0		1	1	
					CH 4: Chi-Square Distributions	1								0		1	1	
					CH 6: Correlation and Regression	1								0		1	1	
Total Credit for Theme 4		9	0.15			15		0	3	0	2	0	4	9	0	6	15	
Theme Five Management Science and Financial Management Share = 20 items from the total	Operations Management	4	8%	Comprehen d the concepts, techniques and applications of materials, production and operations management .	CH 1: Operations Function	1	• Define operations management • Describe operations management, its scope and activities	1							1			1
					CH 2: Operations Strategy for Competitive Advantage	1	• Understand operations strategy and competitiveness		1					1			1	
					CH 3: Product and Service Design	1	• Describe the decision involved in designing and controlling the operations system.			1					1			1
					CH 4: Process Selection and Capacity Planning	1				1					1			1
					CH 5: Facility Location	1	• Understand facility location and layout		1						1			1
					CH 6: Facility Layout	1			1						1			1
					CH 7: Quality Management and Control	1	• Discuss aggregate planning • Apply selected quantitative tools, techniques and models		1						1			1
					CH 8: Aggregate Planning	1									0		1	1

	Financial Management	3	5%	Understand financial resource acquisition and their effective utilization in managing an organization	CH 1: An Overview of Financial Management	1	• Define the term financial management	1							1			1
				Manage financial resources of any organization by applying financial principles.	CH 2: Financial Analysis and Planning	1	• Make financial planning and forecast							0		1	1	
					CH 3: The Time Value of Money and The Concept of Interest	1	• Understand the concept of time value of money							0		1	1	
					CH 4: Bond and Stock Valuation and The Cost of Capital	1	• Understand techniques of asset evaluation and the cost of capital							0		1	1	
					CH 5: Investment Decision Making /Capital Budgeting	1	• Familiar with different investment decisions		1					1			1	
	Operations Research	4	7%	Perform various quantitative analysis techniques and tools for supporting managerial decisions.	CH 1: Introduction to Operations Research	1	• Understand the significance of OR in managerial decision making • Understand the different models of OR. • Appreciate the application of OR model in solving different quantitative problem.		1						1			1
					CH 2: Linear Programming	2					1			1		1	2	
					CH 3: Transportation and Assignment Problems	2					1			1		1	2	
					CH 4: Decision Theory	1								0		1	1	
					CH 5: Network Models	1								0		1	1	
	Total Credit for Theme 5		11	0.2			20		2	6	2	2	0	0	12	0	8	20

10. Conclusion

Exit examination can have a vital role in producing knowledgeable, skillful and attitudinally matured graduates. It contributes to prepare competent graduates as it can serve as a quality check for effectiveness. It also helps in improving academic programs quality and effectiveness. Furthermore, it can create the platform for cooperation among academic programs at different universities to work jointly to improve the programs quality.

In view of this, this document is produced to assist the setting of the exit examinations for all programs, which is being delivered by Ministry of Education. To meet the graduation profile, competency and learning outcome, exit exam competency selection and identifying core course was done for 2015 EC graduating students. As a result, preparing test blueprint is necessary to prepare fairly distributed items based on the above criteria.
