Started on Thursday, 29 June 2023, 6:21 PM

State Finished

Completed on Thursday, 29 June 2023, 7:40 PM

Time taken 1 hour 18 mins

Grade 82.00 out of 100.00

Question 1

Incorrect

Mark 0.00 out of 1.00

Flag question

One solution to the multivalued dependency constraint problem is to:

- ☐ a. Split the relation into two relations, each with a single theme.
- ☐ b. Change the theme
- ☐ c. Create a new theme
- ☒ d. Add a composite key

Question 2

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following is a passed value to a C++ function that is used in the function computation?

- ☐ a. Return value
- ☐ b. Scope value
- ☐ c. Default parameter
- ☒ d. Function argument

Question 3

Correct

Mark 1.00 out of 1.00

Flag question

In relational databases, key which are considered as type of reference attribute is classified as

- ☒ a. Foreign keys
- ☐ b. Composite keys
- ☐ c. String keys
- ☐ d. Floating keys

Question 4

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following data structures is best suited for implementing a hash table?

- ☐ a. Stack
- ☐ b. Queue
- ☐ c. Linked list
- ☒ d. Array

Question 5

Correct

Mark 1.00 out of 1.00

Flag question

In database management system FD stands for_____

- ☐ a. Facilitate dependency
- ☒ b. Functional dependency
- ☐ c. Functional data
- ☐ d. A and B are correct

Question **6**

Correct

Mark 1.00 out of 1.00

Flag question

What does the following relational algebra expression do? $\sigma_{\text{amount} > 1200}(\text{Loan})$

- ☐ a. Finds all the tuples in Loan
- ☐ b. Retrieve the amount attribute in Loan where the amount is greater than 1200
- ☒ c. Finds all the tuples in Loan where the amount is greater than 1200
- ☐ d. All are answer

Question **7**

Correct

Mark 1.00 out of 1.00

Flag question

In relational model terminology, table is considered as _____

- ☐ a. range
- ☐ b. domain
- ☒ c. relation
- ☐ d. tuple

Question **8**

Correct

Mark 1.00 out of 1.00

Flag question

In a system using virtual memory, the physical memory is divided into _____ and the virtual address space is divided into equally-sized partitions called _____.

- ☐ a. Pages, Page frames
- ☒ b. Page frames, pages
- ☐ c. Segment, page
- ☐ d. Page, Segment

Question **9**

Correct

Mark 1.00 out of 1.00

Flag question

A _____ is a set of entities of the same type that share the same properties, or attributes.

- ☒ a. Entity set
- ☐ b. Attribute set
- ☐ c. Relation set
- ☐ d. Entity model

Question **10**

Correct

Mark 1.00 out of 1.00

Flag question

What is the purpose of DOCTYPE declaration in HTML?

- ☒ a. It defines the version of HTML used in the document.
- ☐ b. It specifies the character encoding for the document.
- ☐ c. It sets the background color of the document.
- ☐ d. It defines the title of the document.

Question **11**

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following is not an advantage of using algorithmic programming?

- ☐ a. Greater control and organization over code
- ☐ b. Easier to debug and maintain
- ☐ c. Improved system performance
- ☒ d. Limited functionality and flexibility

Question **12**

Correct

The structural evolutionary prototyping model of software development process is

Mark 1.00 out of 1.00

Flag question

- ☐ a. The best approach to use for projects with large development teams
- ☐ b. It is not important for creating awareness of additional needed functionality
- ☐ c. A reasonable approach when requirement is well defined
- ☒ d. A useful approach when a customer cannot define requirements clearly

Question 13

Incorrect

Mark 0.00 out of 1.00

Flag question

What is the use of the <noscript> tag in Javascript?

- ☐ a. The contents are displayed by non-JS-based browsers.
- ☐ b. Clears all the cookies and cache
- ☒ c. Both A and B
- ☐ d. None of the above

Question 14

Correct

Mark 1.00 out of 1.00

Flag question

The string _____ method compares values lexicographically and returns an integer value.

- ☒ a. compareTo()
- ☐ b. =
- ☐ c. Equals()
- ☐ d. All

Question 15

Correct

Mark 1.00 out of 1.00

Flag question

What is the difference between block-level and inline elements?

- ☐ a. Block-level elements are displayed horizontally, while inline elements are displayed vertically.
- ☒ b. Block-level elements take up the full width of the container, while inline elements only take up the necessary space.
- ☐ c. Block-level elements cannot contain other elements, while inline elements can.
- ☐ d. Block-level elements are used for headings, while inline elements are used for text formatting.

Question 16

Correct

Mark 1.00 out of 1.00

Flag question

Which design pattern is used to provide a way of handling a request by passing it through a series of handlers until it is handled or rejected?

- ☐ a. Bridge Pattern
- ☒ b. Chain of Responsibility Pattern
- ☐ c. Command Pattern
- ☐ d. Builder Pattern

Question 17

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following is not a type of variable scope in C++?

- ☐ a. Global
- ☐ b. Local
- ☐ c. Static
- ☒ d. Dynamic

Question 18

Correct

Mark 1.00 out of 1.00

Certain facts of data elements which represents corresponding real-world entity is_____.

- ☒ a. Relation

Flag question

- ☐ b. Tuple
- ☐ c. Column header
- ☐ d. All of the above.

Question 19

Correct

Mark 1.00 out of 1.00

Flag question

Data manipulation language (DML) is not to:-

- ☒ a. Create information table in the database
- ☐ b. Insertion of new information into the database
- ☐ c. Deletion of information in the database
- ☐ d. Modification of information in the database

Question 20

Incorrect

Mark 0.00 out of 1.00

Flag question

_____ is software design describing how the software elements, hardware elements, and end-users communicate with one another.

- ☒ a. Architectural Design
- ☐ b. Component level Design
- ☐ c. Interface Design
- ☐ d. Detailed Design

Question 21

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following is responsible for the visual presentation and layout of a website?

- ☒ a. Front-end technology
- ☐ b. Back-end technology
- ☐ c. Database technology
- ☐ d. Networking technology

Question 22

Correct

Mark 1.00 out of 1.00

Flag question

The descriptive property of each entity set is _____

- ☐ a. Entity
- ☒ b. Attribute
- ☐ c. Relation
- ☐ d. Model

Question 23

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following sorting compares adjacent elements in a list and switches whenever necessary?

- ☐ a. Quick sort
- ☒ b. Bubble sort
- ☐ c. Selection sort
- ☐ d. None of the above

Question 24

Correct

Mark 1.00 out of 1.00

Flag question

What is a common method for preventing buffer overflow vulnerabilities in software?

- ☒ a. Implementing proper input validation
- ☐ b. Allowing unlimited input
- ☐ c. Using weak encryption
- ☐ d. Ignoring security patches

Question 25

Correct

Mark 1.00 out of 1.00

Flag question

An entity in A is associated with at most one entity in B, and an entity in B is associated with at most one entity in A. This is called as _____?

- ☐ a. One-to-many
- ☒ b. One-to-one
- ☐ c. Many-to-many
- ☐ d. Many-to-one

Question 26

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following are not the concerns of AI that confront society?

- ☐ a. Inequality
- ☐ b. Bias
- ☐ c. Security and privacy
- ☒ d. None of these

Question 27

Correct

Mark 1.00 out of 1.00

Flag question

In relational databases, key which are considered as type of reference attribute is classified as

- ☒ a. Foreign keys
- ☐ b. Composite keys
- ☐ c. String keys
- ☐ d. Floating keys

Question 28

Correct

Mark 1.00 out of 1.00

Flag question

Among the following, one is the scope of product development life cycle (PDLC)?

- ☐ a. Project resource
- ☐ b. Cost
- ☐ c. Schedule
- ☒ d. System design

Question 29

Correct

Mark 1.00 out of 1.00

Flag question

Data manipulation language (DML) is not to:-

- ☒ a. Create information table in the database
- ☐ b. Insertion of new information into the database
- ☐ c. Deletion of information in the database
- ☐ d. Modification of information in the database

Question 30

Incorrect

Mark 0.00 out of 1.00

Flag question

In project time management knowledge area, the output of defining activity is?

- ☐ a. Project management plan
- ☒ b. Work package
- ☐ c. Milestone list
- ☐ d. all

Question 31

Correct

In database state update operation, DELETE operation may violate _____ operation.

Correct
Mark 1.00 out of 1.00
Flag question

- ☐ a. Domain constraint
- ☐ b. Key constraint
- ☒ c. Referential integrity constraint
- ☐ d. None of the above

Question 32
Correct
Mark 1.00 out of 1.00
Flag question

The TCP/IP Host to Host network layer corresponds to the _____ layer of the OSI reference model

- ☐ a. Physical
- ☐ b. Physical and Data Link
- ☐ c. Network
- ☒ d. Transport

Question 33
Incorrect
Mark 0.00 out of 1.00
Flag question

Requirement approval and customer sign-off must be conducted before the project starts, this type of r/ship is?

- ☒ a. External dependency
- ☐ b. Discretionary dependency
- ☐ c. Mandatory dependency
- ☐ d. All

Question 34
Correct
Mark 1.00 out of 1.00
Flag question

Information hiding is a design principle that aims to:

- ☒ a. Reduce coupling between system components by limiting their access to each other's internal details.
- ☐ b. Reduce the complexity of a system by exposing its internal details.
- ☐ c. Increase the flexibility of a system by making its internal details accessible.
- ☐ d. Increase coupling between system components by allowing them to share internal details.

Question 35
Correct
Mark 1.00 out of 1.00
Flag question

One of the following cost estimation type is provides early estimates of cost for project selection decision process?

- ☐ a. Budgetary estimate
- ☒ b. Rough order of magnitude estimate
- ☐ c. Definitive estimate
- ☐ d. A and B

Question 36
Correct
Mark 1.00 out of 1.00
Flag question

Which one of the following is not true about project time management?

- ☒ a. Combine project tasks together and act on it
- ☐ b. Find out various tasks and correlate them
- ☐ c. Estimate time frame required for each task
- ☐ d. Calculate total start-to-finish time.

Question 37
Correct

Which one of the following is a Not a characteristic of good design?

Mark 1.00 out of 1.00

Flag question

- ☐ a. software engineer must design the modules with the goal of high cohesion and low coupling
- ☒ b. A software engineer must design the modules with the goal of low cohesion and high coupling ✓
- ☐ c. A design must implement all explicit requirements from the analysis model and accommodate all implicit requirements desired by the user
- ☐ d. A good design should be modular

Question 38

Incorrect

Mark 0.00 out of 1.00

Flag question

In database state update operation, INSERT operation may violate_____ constraints.

- ☐ a. Domain constraint
- ☐ b. Key constraint
- ☐ c. Entity integrity constraint
- ☒ d. All of the above ✗

Question 39

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following data structures is best suited for implementing a priority queue?

- ☒ a. Heap ✓
- ☐ b. Array
- ☐ c. Stack
- ☐ d. Linked list

Question 40

Correct

Mark 1.00 out of 1.00

Flag question

As _____ operating system is responsible for allocating resources to the various applications so that access to the resources is synchronized and operations are correct and consistent.

- ☐ a. An extended machine
- ☒ b. A resource manager ✓
- ☐ c. A virtual Machine
- ☐ d. A multiplexer

Question 41

Correct

Mark 1.00 out of 1.00

Flag question

In mapping from ER-diagram to relational model attribute became _____.

- ☐ a. Schema
- ☐ b. Tuples
- ☒ c. Column-headers ✓
- ☐ d. State

Question 42

Correct

Mark 1.00 out of 1.00

Flag question

A diagramming analysis technique used to select the best course of action when future outcomes are uncertain is?

- ☐ a. Impact matrix
- ☐ b. Critical chain scheduling
- ☒ c. Decision tree ✓
- ☐ d. Gant chart

Question 43

Correct

In relational model terminology, table is considered as_____

Correct
Mark 1.00 out of 1.00
Flag question

- ☐ a. range
- ☐ b. domain
- ☒ c. relation
- ☐ d. tuple

Question 44
Incorrect
Mark 0.00 out of 1.00
Flag question

Which of the following can be a multivalued attribute?

- ☐ a. Phone-number
- ☐ b. Name
- ☒ c. Date-of-birth
- ☐ d. Age

Question 45
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following statements is Not correct?

- ☐ a. A test set that achieves 100% branch coverage will also achieve 100% statement coverage.
- ☐ b. A minimal test set that achieves 100% branch coverage will generally detect more faults than one that achieves 100% statement coverage.
- ☒ c. A minimal test set that achieves 100% statement coverage will generally detect more faults than one that achieves 100% branch coverage
- ☐ d. None

Question 46
Correct
Mark 1.00 out of 1.00
Flag question

What is the purpose of a security policy?

- ☐ a. To prevent all security breaches from occurring
- ☒ b. To provide guidance on how to protect information assets
- ☐ c. To guarantee complete security of all information assets
- ☐ d. To restrict access to all information assets

Question 47
Correct
Mark 1.00 out of 1.00
Flag question

In database management system FD stands for_____

- ☐ a. Facilitate dependency
- ☒ b. Functional dependency
- ☐ c. Functional data
- ☐ d. A and B are correct

Question 48
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following is a mechanism for passing a large amount of data by reference in C++?

- ☐ a. Argument passing
- ☐ b. Return value
- ☐ c. Parameter passing
- ☒ d. Pointer passing

Question 49
Incorrect
Mark 0.00 out of 1.00
Flag question

Which one is the main constraints that apply to a specialization/generalization relationship?

- ☐ a. Aggregation
- ☐ b. Composition

- ☒ c. disjoint constraints
- ☐ d. all

✗

Question 50

Correct

Mark 1.00 out of 1.00

Flag question

When the switch statement matches the expression with the given labels, how is the comparison done?

- ☒ a. Both the datatype and the result of the expression are compared.
- ☐ b. Only the datatype of the expression is compared
- ☐ c. Only the value of the expression is compared
- ☐ d. None of the above

✓

Question 51

Incorrect

Mark 0.00 out of 1.00

Flag question

In a graph of n nodes and n edges, how many cycles will be present?

- ☐ a. At most 1
- ☐ b. At most 2
- ☒ c. Depends on the graph
- ☐ d. Exactly 1

✗

Question 52

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following is not included in the declaration of a C++ function?

- ☐ a. Function name
- ☐ b. Return type
- ☐ c. Argument list
- ☒ d. Function body

✓

Question 53

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following is an example of a back-end technology?

- ☐ a. CSS
- ☐ b. JavaScript
- ☒ c. PHP
- ☐ d. Bootstrap

✓

Question 54

Incorrect

Mark 0.00 out of 1.00

Flag question

The part of operating system that is responsible for managing the memory hierarchy in computer system is called _____

- ☒ a. Memory Management Unit
- ☐ b. Memory Manager
- ☐ c. Translation Look aside Buffer
- ☐ d. Memory abstraction unit

✗

Question 55

Incorrect

Mark 0.00 out of 1.00

Flag question

Scope aspect of IT projects quality which is defined as the ability of a product or service to perform as expected under normal conditions is?

- ☐ a. Maintainability
- ☐ b. Reliability
- ☐ c. Performance
- ☒ d. Functionality

✗

Question **56**

Correct

Mark 1.00 out of 1.00

Flag question

Among the following one is mission driven system development life cycle

- ☐ a. Predictive life cycle
- ☐ b. Hybrid life cycle
- ☐ c. Adaptive life cycle
- ☒ d. All except B

Question **57**

Correct

Mark 1.00 out of 1.00

Flag question

One solution to the multivalued dependency constraint problem is to:

- ☒ a. Split the relation into two relations, each with a single theme.
- ☐ b. Change the theme
- ☐ c. Create a new theme
- ☐ d. Add a composite key

Question **58**

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following is not a basic data type in C++?

- ☐ a. int
- ☐ b. float
- ☐ c. char
- ☒ d. decimal

Question **59**

Incorrect

Mark 0.00 out of 1.00

Flag question

Which of the following can be a multivalued attribute?

- ☐ a. Phone-number
- ☐ b. Name
- ☒ c. Date-of-birth
- ☐ d. Age

Question **60**

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following statements explains portability in non-functional requirements?

- ☐ a. It is the effort needed to learn, operate, and interpret output of the software.
- ☒ b. It is a degree to which software running on one platform can easily be converted to run on another platform
- ☐ c. The ability of the system to behave consistently in a user-acceptable manner when operating within the environment for which the system was intended
- ☐ d. None of the mentioned

Question **61**

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following is time multiplexed resource?

- ☐ a. Memory
- ☒ b. CPU
- ☐ c. Network
- ☐ d. Compact Disk

Question **62**

Relational Algebra Operations from Set Theory (e.g. UNION) states operands in relation must be

Incorrect
Mark 0.00 out of 1.00
Flag question

Relational Algebra operations from Set theory (e.g. union); data operands in relation must be type compatible means:

- ☐ a. Must have same number of attributes
- ☐ b. Pair of corresponding attributes must be same domain
- ☒ c. Must have same data type
- ☐ d. All of the above.

Question 63
Correct
Mark 1.00 out of 1.00
Flag question

Which protocol is commonly used in the client-server architecture for web-based applications?

- ☐ a. Simple Mail Transfer Protocol (SMTP)
- ☒ b. Hyper Text Transfer Protocol (HTTP)
- ☐ c. File Transfer Protocol (FTP)
- ☐ d. Network News Transfer Protocol (NNTP)

Question 64
Incorrect
Mark 0.00 out of 1.00
Flag question

Alpha testing is:

- ☐ a. Post-release testing by end user representatives at the developer's site
- ☐ b. Post-release testing by testing team at the developer's site
- ☒ c. Pre-release testing by end user representatives at their sites
- ☐ d. Pre-release testing by testing team at the developer's site

Question 65
Correct
Mark 1.00 out of 1.00
Flag question

The android.graphics package has support for

- ☐ a. Canvas
- ☐ b. Bitmap
- ☐ c. Paints
- ☒ d. All of the above

Question 66
Correct
Mark 1.00 out of 1.00
Flag question

What is the role of a web server in the context of web development?

- ☐ a. To create and design web pages
- ☒ b. To provide a platform for hosting and delivering web content
- ☐ c. To optimize the performance of a website
- ☐ d. To handle client-side scripting and interactivity

Question 67
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following is an example of a flowchart symbol that represents a decision?

- ☐ a. Oval
- ☐ b. Rectangle
- ☒ c. Diamond
- ☐ d. Circle

Question 68
Incorrect
Mark 0.00 out of 1.00
Flag question

Which technology is used for real-time communication and data transfer between web browsers and servers?

- ☐ a. AJAX
- ☐ b. JSON

- ☐ c. REST
- ☒ d. WebSocket

Question **69**

Correct

Mark 1.00 out of 1.00

Flag question

What is the purpose of form validation in PHP?

- ☐ a. To enhance user interface design
- ☐ b. To protect against SQL injection attacks
- ☒ c. To ensure proper data entry by users
- ☐ d. To improve website performance

Question **70**

Correct

Mark 1.00 out of 1.00

Flag question

The _____ operation, allows us to find tuples that are in one relation but are not in another.

- ☐ a. Union
- ☒ b. Set-difference
- ☐ c. Difference
- ☐ d. Intersection

Question **71**

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following is a C++ keyword that is used to define a variable?

- ☐ a. input
- ☐ b. output
- ☒ c. float
- ☐ d. None of the above

Question **72**

Correct

Mark 1.00 out of 1.00

Flag question

What is the primary goal of software security?

- ☐ a. To make software faster
- ☐ b. To make software more user-friendly
- ☒ c. To prevent unauthorized access and protect against attacks
- ☐ d. To make software cheaper

Question **73**

Correct

Mark 1.00 out of 1.00

Flag question

Open System Interconnection model is an example of _____ architecture.

- ☐ a. MVC
- ☐ b. Pipe and filter
- ☒ c. Layered
- ☐ d. Client-server

Question **74**

Incorrect

Mark 0.00 out of 1.00

Flag question

An entity in a subclass represents the same 'real world' object as in the superclass, and may possess subclass-specific attributes, as well as those associated with the superclass. This concept is concerned with

- ☐ a. Subclass-superclass
- ☒ b. Inheritance
- ☐ c. Specialization-generalization
- ☐ d. None

Question **75**

Correct

Mark 1.00 out of 1.00

Flag question

Certain facts of data elements which represents corresponding real-world entity is_____.

- ☒ a. Relation
- ☐ b. Tuple
- ☐ c. Column header
- ☐ d. All of the above.

Question **76**

Correct

Mark 1.00 out of 1.00

Flag question

Which of the following is used to execute a specific block of code based on the value of a variable or expression in C++?

- ☐ a. if statement
- ☒ b. switch statement
- ☐ c. else statement
- ☐ d. for loop

Question **77**

Correct

Mark 1.00 out of 1.00

Flag question

An entity that does not have a key attribute and that is identification-dependent on another entity type:

- ☐ a. Entity type
- ☒ b. Weak entity type
- ☐ c. Relationship type
- ☐ d. Relation

Question **78**

Correct

Mark 1.00 out of 1.00

Flag question

Which one of the following is an example of stakeholder in requirement engineering?

- ☐ a. A software Developer
- ☐ b. A project Manager
- ☐ c. An end user of system
- ☒ d. All

Question **79**

Correct

Mark 1.00 out of 1.00

Flag question

Course (Course_ Id, Section, Semester), here the Course_ Id, Section and Semester are _____ and course is a _____.

- ☐ a. Relations, Attribute
- ☒ b. Attributes, Relation
- ☐ c. Tuple, Relation
- ☐ d. Tuple, Attributes

Question **80**

Correct

Mark 1.00 out of 1.00

Flag question

A _____ is a set of entities of the same type that share the same properties, or attributes.

- ☒ a. Entity set
- ☐ b. Attribute set
- ☐ c. Relation set
- ☐ d. Entity model

Question **81**

Correct

Mark 1.00 out of 1.00

🚩 Flag question

Which of the following is benefit of database approach?

- ☐ a. Data can be shared
- ☐ b. Standards can be enforced
- ☐ c. Compactness
- ☒ d. All

Question **82**

Correct

Mark 1.00 out of 1.00

🚩 Flag question

What is the purpose of a default parameter in a C++ function?

- ☐ a. To allow for multiple return values
- ☐ b. To specify the data type of the function
- ☒ c. To provide a default value if an argument is not provided
- ☐ d. To specify the number of times the function is executed

Question **83**

Correct

Mark 1.00 out of 1.00

🚩 Flag question

An entity in A is associated with at most one entity in B, and an entity in B is associated with at most one entity in A. This is called as _____?

- ☐ a. One-to-many
- ☒ b. One-to-one
- ☐ c. Many-to-many
- ☐ d. Many-to-one

Question **84**

Correct

Mark 1.00 out of 1.00

🚩 Flag question

How is time complexity measured?

- ☒ a. By counting number of operations on a given input size
- ☐ b. By counting the input data size
- ☐ c. By counting the number of algorithm
- ☐ d. All of the above mentioned

Question **85**

Incorrect

Mark 0.00 out of 1.00

🚩 Flag question

Routers and core switch can be used for delivering routing services. According to the OSI reference model to which layer do you categorize this network devices?

- ☐ a. Physical Layer
- ☐ b. Data Link Layer
- ☒ c. Network Layer
- ☐ d. Transport Layer

Question **86**

Correct

Mark 1.00 out of 1.00

🚩 Flag question

Which web development technology is used for creating dynamic and interactive web pages?

- ☐ a. HTML
- ☐ b. CSS
- ☒ c. JavaScript
- ☐ d. jQuery

Question **87**

Correct

Mark 1.00 out of 1.00

Which one of the following is unique?
