

Worksheet for 4th Year Health Informatics Graduate Students

1. At which level monitoring & evaluation activities can be done?
A. National level C. International level
B. Regional level.....D. Institution level E. All
2. Which characteristics of M&E indicator the level to which measurements on an indicator come up with similar findings on repeated measurements.
A. Measurable B. Reliable C. Understandable D. Sensitive & Specific
3. Which one of the following is not good characteristics of essential evaluation ethics
A. Treat respondents with candor D. Confidentiality
B. Informed consent E. None
C. Data protection
4. At which stage of a program should monitoring take place?
A. At the beginning of program implementation
B. At the mid-point of the program implementation
C. At the end of the program implementation
D. Throughout the life of the program
5. Which layer of OSI model provides the connection service?
A. Transport layer B. Session layer C. Presentation layer D. Application layer
6.is an ethical principle which states that a professional should not cause extra harm on client and promote the good of client respectively.
A. Beneficent and justice C. Equity and justice
B. Non-maleficent and beneficent D. Beneficent and non-maleficent
7. Which of the following ethical principles should be adhered by health informatics professional since he/she is a health care professional?
A. Integrity B. Fidelity C. openness D. impossibility E. A and D
8. Which one of the following is not the objective of IMIA?
A. Promote informatics in health care and research.
B. Advance and nurture/raise international cooperation.
C. To stimulate research, development and routine application.
D. Move informatics from theory into practice.
E. None
9. Which one of the following choices contains the correct list of guidelines which are the base for private law?
A. Constitution, administrative, criminal C. Administrative, Tort, contract,
B. Tort, contract, constitution D. Criminal, contract, constitution
E. none

10.is an ethical principle which states that a professional should not Cause extra harm on client and promote the good of client respectively.
- A. Beneficent and justice
 - B. Non maleficent and beneficent
 - C. Equity and justice
 - D. Beneficent and non-maleficent
11. Which of the following incorrect comparison profession and occupation because?
- A. Profession requirement of prolonged specialized training before work while inoccupation training takes place at work
 - B. In professional works are autonomous while in occupation workers are highly supervised and controlled
 - C. occupation requires strong commitment & personal identification than Profession
 - D. in profession accountability rests with individual while in occupation Accountability rests with employees
 - E. none
12. The followings are Health related laws which have direct or indirect application to the health informatics profession. except?
- A. Health information and statistics;
 - B. Ethics and patients' rights
 - C. Professional regulation and human rights
 - D. Health insurance
 - E. None
13. U n-illegal act by a professional is always unethical but unethical act is not necessarily illegal.
- A. True
 - B. False
14. one of the following is true about medical record
- A. It is always property of patients
 - B. It should be accessible to any record seeker
 - C. Patient information can be released from the organization without the consent of the patient
 - D. It can be used for research purpose without patient identification
15. a conflict resolution mechanism which is used to settle conflict by referring how similar conflicts were resolved in the past.
- A. Ethical committee
 - B. informal discussion
 - C. case studies
 - D. code of ethics
16. When there is request of release of pt information, the first thing that we consider is
- E. Authority of individual to the information
 - F. Individual right to the information
 - G. Sensitivity of the information
 - H. Organization interest on the information
17. Which of the following is not activities carried out in HMIS at woreda health offices?

- A. Allocate funds for the HMIS units/personnel
 - B. Implement and monitor HMIS
 - C. Collaborate on the expansion of the GIS & woreda connectivity
 - D. None.
18. One of the following is wrong about firewall
- A. It is the frontline defense
 - B. It can implement in software and hardware
 - C. Used to detect them and cure an infected system
 - D. Prevent unauthorized access to a private network
19. A type of cryptography in which the single common key is used by both sender and receiver for the purpose of encryption and decryption of a message.
- A. Private or Secret key cryptography.
 - B. Asymmetric Key Cryptography.
 - C. Symmetric key cryptography.
 - D. Public key cryptography.
 - E. A and C.
 - F. B and D
20. Which of the following statement is correct?
- A. Privacy generally applied to people while confidentiality is best applied to information.
 - B. Privacy generally applied to information while confidentiality is best applied to people.
 - C. Both privacy and confidentiality is applied to people
 - D. Both privacy and confidentiality is applied to people
21. When can confidentiality be breached?
- A. Within healthcare teams where patients have consented for treatment
 - B. Disclosure in public interests to prevents serious harm to third party
 - C. Disclosure to statutory body in communicable disease reporting
 - D. All
22. Which of the following is intentional security threat?
- A) Hacker
 - B) Fire
 - C) Flood
 - D) Power failure
23. Which of the following is statement correct?
- A. Disclosure of every pt information is supported by law
 - B. Security is current people's problem
 - C. Limiting breach of pt information is pt right
 - D. Confidentiality is mostly issue of the health professional
24. Wrong about HIPPA privacy rule
- A. Individual has a right to amend his information
 - B. Rule is prepared strictly for public benefit
 - C. In HIPPA rule violating the privacy of an individual leads to penalty
 - D. HIPPA law is applicable in stakeholder of health care organization
25. When there is request of release of pt information, the first thing that we consider is
- A. Authority of individual to the information
 - B. Individual right to the information
 - C. Sensitivity of the information

- D. Organization interest on the information
26. One of the following is false about medical record
- A. It is legal document
 - B. It should be kept in secured room
 - C. A copy of medical record leaves the hospital for legal purpose
 - D. Information in medical record pt.'s property
27. Which of the following is/are false about instance and static variables?
- A. Both declared inside a class but outside a method or constructor body.
 - B. Each objects of a class has its own copy of instance variable while static variables are shared by all the objects of the same class.
 - C. Both have default values.
 - D. None
28. Which of the following is False about instance methods?
- A. Can Invoke another instance methods directly.
 - B. Can access instance variables directly.
 - C. Cannot invoke static methods directly.
 - D. None
29. What is/are the use of ' this ' keyword?
- A. Used to call overloaded methods.
 - B. Used to refer hidden class's instance variable.
 - C. Used to call overloaded constructor.
 - D. B and C.
30. Which of the following is False about Static methods?
- A. Cannot Invoke another instance methods directly.
 - B. Cannot access instance variables directly.
 - C. Can invoke other static methods directly.
 - D. None
31. which component of GIS is most important
- A. People
 - B. software
 - C. data
 - D. network
32. Which one of the following is cons of GIs
- A. Confidentiality Issue
 - B. It requires huge space
 - C. it is software dependent
 - D. All
33. why GIS Is unique
- A. it is open source software
 - B. Handles attributable data
 - C. it handles referencing or spatial data
 - D it is the only system which identify disease burden
34. All of the following statement is true. Except?
- A. There is no idea of project in earliest day of human history
 - B. When we say project is temporary endeavor, we mean that a project has a indefinite beginning & end.
 - C. National policy revision cannot make project to terminate.
 - D. Trademark is an example of tangible asset
 - E. none
35. Which of the following statement is false about project sponsor roles?

- A. Concern himself/herself for routine activity
 - B. Approve and fund budget
 - C. Appoint project manager
 - D. Define and identify project
 - E. None
36. Repetitive elements present in some project does not change the unique characteristics of the project work. A. True B. False
37. Which of the following the advantage of functional pure management structure?
- A. Lose training investment
 - B. Team members do not feel secure
 - C. Inefficiency, no place else to use key people
 - D. High risks in early project phases.
38. From the following which one is not important for project management?
- A. Gantt charts
 - B. Project Evaluation and Review Technique (PERT)
 - C. project network diagrams
 - D. critical path analysis
 - E. Microsoft word & excel F) none
39. One is a section of the Implementation Plan to determine how “the ordered products necessary for producing deliverables can be delivered on time and within the allocated budget.
- A. Project management process
 - B. Project planning process
 - C. Project procurement management
 - D. All
40. Which of the following the advantage of functional project management structure?
- A. Clear line of authority
 - B. Career development
 - C. Comfortable and easy
 - D. No customer focal point
41. Projects involve using hardware, software, & networks to create a product, service, or result is called. A. HI-project B. IT-project C. health-project D. all
42. Which one of the following project management strategy is performed during project execution process?
- A. Quality Planning
 - C. Quality Control (QC)

B. Quality Assurance (QA) D. Independent Verification and Validation

43. Which of the following activity does not performed during project initiation phase?

A. the business problem or opportunity is identified,

B. a solution is defined,

C. feasibility study is conducted,

D. a project is formed and a project team is appointed

E. none

44. Which characteristics of project is explaining the idea” difficult to define its objectives clearly, estimate how long it will take to complete, or determine how much it will cost”

A. Temporary

C. project uncertainty

B. Project uniqueness

D. project certainty

45. which one is the real chronological sequence of SDLC

A. planning, analysis, design, implementation, testing

B. planning, design, analysis, implementation, testing

C. planning, analysis, design, implementation, testing

D. planning, analysis, implementation, design, testing

46. One of the following is the services which can be provided during Real time (synchronous) Telemedicine?

A. Tele-Radiology B. Tele-Pathology C. Tele-Dermatology D. Tele-Psychiatry

47. Which of the following require largest kilo byte to be transmitted in Telemedicine?

A. Audio B. Document C. Moving image D. Still image

48. If you want to know the proportion of women of reproductive age (15-49 years) who are not pregnant and are accepting a modern contraceptive method (new and repeat acceptors) which is called the contraceptive acceptance rate. What would be the appropriate indicator formula?

A. (Women of age (15-49 years) not pregnant /number of new and repeat acceptors)*100

B. (Number of new and repeat acceptors/women of age (15-49 years) who are not pregnant)*100

C. (Number of new acceptors/repeat acceptors)*100

D. (Women of age 15-49 years who are pregnant/women of age 15-49 years not pregnant)*100

49. Which one of the following is incorrect about the importance of case definition in surveillance?

A) Facilitates observation of trends within a specified geographic areas

B) Useful in areas where there is no laboratory

C) Facilitate comparisons more accurately from areas to area

D) Delay early detection and management of cases

50. One of the following is true about health record

A) The term “health record” implies clinician records for diagnosis and treatment, while the term “medical records” more broadly denotes anything related to the general condition of the body.

B) A single record of all data on an individual's health status from birth to death

C) Multiple records of all data on an individual's health status from birth to death

D) all

51. What is the **output** for the following code?

```
#include <iostream>
using namespace std;
int main(){
    int num=10;
    for(int i=0;i<num;i++){
        if(i%2!=0)
            continue;
        cout<<i;
    }
    return 0;
}
```

A. 2,4,6,8

B. 0,2,4,6,8

C. 1,3,5,7

D. 0,1,3,5,7

52. What is/are Output(s) of the following code?

```
include <iostream>
using namespace std;
void add(int& num, int& Num){
    num += 3;
    Num += 3;
}
void add( int& num1,float& num2){
    num1 +=4;
    num2 +=4;
}
int main(){
    int a=2, b= 5;
    cout<<a<<" , "<<b;
    add(a,b);
    cout<<"and";
    cout<<a<<" , "<<b;
    return 0;
}
```

A. 2,5 and 5,8

B. 2,5 and 6,9

C. 5,8 and 2,5

D. 6,9 and 2,5

53. Which type of memory must be constantly refreshed?

A. DRAM

B. SRAM

C. L1 cache

D. All

None

54. From the following which one is false statement

- A. During computer troubleshooting soft communication skill with the user is important skill
- B. Computer troubleshooting is naturally gifted skill not learned.
- C. During computer troubleshooting hypothesis generation is required
- D. Occupational health and safety is concerned with protecting the safety, health and welfare of people engaged in workplace.

55. Which one of the following epidemiological tools used to measure closed population?

- A. Cumulative incidence B. Incidence density C. Incidence rate D. Both B and C

56. Which data mining technique is used to find correlation among given data?

- A. Association rule mining B. Classification C. Clustering D. Prediction

57. The sequence of knowledge discovery in data mining is?

- A. Information→ Data→ Facts→ Knowledge
- B. Data→ Information→ Facts→ Knowledge
- C. Data→ Facts→ Information→ Knowledge
- D. Facts→ Data→ Information→ knowledge

58. Which of the following is **false** about Dynamic website?

- A. A website with contents change over a time
- B. A website with contents customized for individual user.
- C. A website with contents generated automatically.
- D. None

59. One of the following include all the rest.

- A. \$_POST B. \$_GET C. \$_REQUEST D. \$_COOKIE

60. Which one of the following is **true** about Scripting language?

- A. A language that doesn't need the compilation step but interpreted.
- B. A language often utilized to create a dynamic website
- C. PHP is one of scripting language
- D. All

61. _____ is the type of index in the database design which cannot access data directly but can access through the heap or a clustered index.

- A. Clustered indexes B. Non-clustered indexes C. Unique indexes D. Composite indexes

62. Which condition occurs when two or more transactions wait for each other to unlock data?

- A. Deadlock B. Shared lock C. Exclusive lock D. Binary lock

63. What is database management system security mean?

- A. Preventing access to data
 - B. Allowing access to data only to authorized users
 - C. Preventing changing data
 - D. Introducing integrity constraints
64. Which phase in a two-phase lock is when a transaction releases all locks and cannot obtain any new locks?
- A. Growing B. Shrinking C. Locking D. Unlocking
65. Typically a network design should include one of the following except:
- A. Cabling structure
 - B. IP addressing structure
 - C. Network security architecture and overall network security processes
 - D. Quantity, type, and location of network devices
 - E. None
66. Which type of server is mainly used in web-based applications that have a 3-tier architecture, and consisting of a graphical user interface?
- A. Mail server
 - B. Database server
 - C. Application server
 - D. Proxy server
67. Why is the Network Bandwidth Monitoring Important?
- A. Identify bandwidth needs
 - B. Boost network performance
 - C. Save your budget
 - D. Enhance security
 - E. All
68. All are why a Domain controller is important except:
- A. it authenticates user identities by making sure that only trusted users are able to connect to an organization's resources
 - B. Decentralized user and resources management
 - C. Backups and network security is controlled centrally
 - D. Encryption of user data
69. What is the role of conflict detection in data replication?
- A. To identify inconsistencies or conflicts in replicated data
 - B. To encrypt data for secure transmission
 - C. To compress data for efficient storage
 - D. To synchronize data across different devices
70. How can you ensure data consistency in replicated mobile data?
- A. Using data consistency models and synchronization protocols
 - B. Encrypting data during transmission
 - C. Compressing data for efficient storage
 - D. Minimizing network latency during synchronization
71. Which class is used to schedule tasks to be executed at a specific time or interval in Android?
- A. Timer B. Handler C. AsyncTask D. AlarmManager
72. 46. Which method is responsible for handling back button presses in Android?
- A. onBackPressed()
 - B. onBackPressed()
 - C. onNavigateUp()
 - D. onOptionsItemSelected()
