

Q. 1	What does the neoclassical theory of consumer behavior focus on?
	a) Government decisions
	b) Corporate behavior
	c) Individual's decision-making process
	d) Macroeconomic trends
	Answer: c
Q. 2	The concept of utility in consumer behavior refers to:
	a) Utility bills and costs
	b) Tools and machines
	c) The satisfaction derived from consumption
	d) Economic profit from business operations
	Answer: c
Q. 3	Which of the following is a primary assumption of the neoclassical consumer theory?
	a) Consumers always prefer more of a good to less
	b) Consumers prefer less to more
	c) Consumption decisions do not depend on prices
	d) All goods are perfect substitutes
	Answer: a

Q. 4	If the marginal utility of a good is decreasing, it implies:
	a) Consuming more of the good will increase total utility at a decreasing rate
	b) Total utility is decreasing
	c) Marginal utility is always negative
	d) The price of the good is decreasing
	Answer: a
Q. 5	Indifference curves represent combinations of goods that:
	a) Cost the same amount
	b) Are consumed in the same quantities
	c) Yield the same level of utility
	d) Have the same prices
	Answer: c
Q. 6	The slope of an indifference curve represents:
	a) Marginal rate of transformation
	b) Marginal rate of substitution
	c) Income effect
	d) Price elasticity
	Answer: b

Q. 7	Which of the following will NOT cause a shift in a consumer's indifference curve?
	a) A change in tastes and preferences
	b) A change in income
	c) A change in the price of a related good
	d) All of the above will cause a shift
	Answer: d
Q. 8	A Giffen good is a good for which:
	a) The income effect outweighs the substitution effect, leading to a higher quantity demanded as the price rises
	b) The substitution effect is zero
	c) The price effect is positive
	d) The demand curve is upward sloping
	Answer: a
Q. 9	If the price of a good falls and the consumer buys more of it due to the relative attractiveness of its price compared to other goods, this is called:
	a) The Giffen effect
	b) The substitution effect
	c) The price effect
	d) The income effect
	Answer: b

	Answer: a
Q. 9	If the price of a good falls and the consumer buys more of it due to the relative attractiveness of its price compared to other goods, this is called:
	a) The Giffen effect
	b) The substitution effect
	c) The price effect
	d) The income effect
	Answer: b
Q. 10	Which of the following is NOT an assumption of the neoclassical theory of consumer behavior?
	a) Consumers can rank their preferences
	b) Preferences are transitive
	c) All consumers have the same preferences
	d) More is better than less
	Answer: c

Microeconomics II

Q. 1	Monopolistically competitive firms differentiate their products based on:
	a) Price only
	b) Non-price factors
	c) Both price and non-price factors
	d) Neither price nor non-price factors
	Answer: b) Non-price factors
Q. 2	In monopolistic competition, a firm's demand curve is:
	a) Perfectly elastic
	b) Perfectly inelastic
	c) Downward sloping
	d) Upward sloping
	Answer: c) Downward sloping
Q. 3	A monopolistically competitive firm maximizes profit where:
	a) $MR > MC$
	b) $MR = MC$
	c) $MR < MC$
	d) $MC = P$

Q. 4	In the long run, a monopolistically competitive firm will earn:
	a) Positive economic profit
	b) Negative economic profit
	c) Zero economic profit
	d) Infinite profit
	Answer: c) Zero economic profit
Q. 5	If a monopolistically competitive firm is earning positive economic profits, other firms will:
	a) Exit the industry
	b) Remain unchanged
	c) Enter the industry
	d) Reduce production
	Answer: c) Enter the industry
Q. 6	Excess capacity in monopolistic competition means the firm is:
	a) Producing at the minimum average cost
	b) Producing more than the minimum average cost
	c) Producing less than the minimum average cost
	d) Producing at its efficient scale
	Answer: c) Producing less than the minimum average cost

Q. 7	In the short run, monopolistically competitive firms can earn:
	a) Only losses
	b) Only profits
	c) Either profits or losses
	d) Neither profits nor losses
	Answer: c) Either profits or losses
Q. 8	Monopolistically competitive firms in the long run operate:
	a) On their average cost curve
	b) Below their average cost curve
	c) Above their average cost curve
	d) Where marginal cost equals marginal revenue
	Answer: a) On their average cost curve
Q. 9	Which is true for a monopolistically competitive firm in long-run equilibrium?
	a) $P = MC$
	b) $P = AC$
	c) $P > MC$
	d) $P < AC$
	Answer: c) $P > MC$

Q. 9	Which is true for a monopolistically competitive firm in long-run equilibrium?
	a) $P = MC$
	b) $P = AC$
	c) $P > MC$
	d) $P < AC$
	Answer: c) $P > MC$
Q. 10	What would happen if firms in monopolistic competition were to standardize their products?
	a) They would become perfect competitors
	b) They would become monopolies
	c) They would exit the market
	d) They would face upward sloping demand curves
	Answer: a) They would become perfect competitors

Macroeconomics I

Q. 1	Which school of thought emphasizes the role of aggregate demand in the economy?
	a) Supply-side economics
	b) Monetarism
	c) Austrian school
	d) Keynesianism
	Answer: d) Keynesianism
Q. 2	Who is often referred to as the father of modern macroeconomics and the principal founder of Keynesian economics?
	a) Friedrich Hayek
	b) Milton Friedman
	c) John Maynard Keynes
	d) Adam Smith
	Answer: c) John Maynard Keynes
Q. 3	Which school of thought believes that changes in the money supply directly impact the economy?
	a) Monetarism
	b) New Classical
	c) Keynesianism
	d) Neo-Keynesianism

Q. 4	Which macroeconomic school emphasizes the importance of rational expectations?
	a) Neo-Keynesianism
	b) New Classical
	c) Austrian school
	d) Structuralism
	Answer: b) New Classical
Q. 5	The idea that markets always clear and always operate at full employment is a tenet of which school?
	a) Keynesianism
	b) Monetarism
	c) New Classical
	d) Austrian school
	Answer: c) New Classical
Q. 6	Who is the main figure associated with the monetarist school of thought?
	a) Paul Samuelson
	b) Milton Friedman
	c) Friedrich Hayek
	d) Robert Lucas
	Answer: b) Milton Friedman

Q. 7	Which school of thought places a heavy emphasis on the role of time and uncertainty in the economy?
	a) Supply-side economics
	b) Austrian school
	c) Monetarism
	d) Keynesianism
	Answer: b) Austrian school
Q. 8	The liquidity preference theory is associated with which macroeconomic school of thought?
	a) Neo-Keynesianism
	b) New Classical
	c) Monetarism
	d) Austrian school
	Answer: a) Neo-Keynesianism
Q. 9	Which school of thought suggests that business cycles are driven by technological shocks?
	a) Real Business Cycle theory
	b) Keynesianism
	c) Monetarism
	d) Austrian school
	Answer: a) Real Business Cycle theory

	Answer: a) Neo-Keynesianism
Q. 9	Which school of thought suggests that business cycles are driven by technological shocks?
	a) Real Business Cycle theory
	b) Keynesianism
	c) Monetarism
	d) Austrian school
	Answer: a) Real Business Cycle theory
Q. 10	Who is a prominent figure associated with the Austrian school of economics?
	a) Ludwig von Mises
	b) Milton Friedman
	c) John Maynard Keynes
	d) Paul Krugman
	Answer: a) Ludwig von Mises

Macroeconomic II

Q. 1	The Keynesian Consumption Function postulates that:
	A) Consumption is unrelated to income
	B) Consumption increases at a decreasing rate as income increases
	C) Consumption is solely determined by interest rates
	D) Consumption is not influenced by any factors
	Answer: B
Q. 2	Which of the following is a primary component of the Life-Cycle Hypothesis?
	A) Present consumption is unrelated to future income expectations
	B) Individuals plan their consumption and saving over their lifetime
	C) All savings are used for consumption immediately
	D) Consumption is based solely on current income
	Answer: B
Q. 3	The Permanent Income Hypothesis suggests that consumption depends on:
	A) Temporary income
	B) Current income only
	C) Expected lifetime average income
	D) Past income

Answer: C

Q. 4

Which hypothesis suggests that consumers might save more during economic booms and consume more during downturns?

A) Absolute Income Hypothesis

B) Relative Income Hypothesis

C) Permanent Income Hypothesis

D) Life-Cycle Hypothesis

Answer: D

Q. 5

Which hypothesis posits that individuals compare their income to others'?

A) Relative Income Hypothesis

B) Absolute Income Hypothesis

C) Permanent Income Hypothesis

D) Life-Cycle Hypothesis

Answer: A

Q. 6

Which factor is not a primary component of the Life-Cycle Hypothesis?

A) Inheritance

B) Social comparisons

C) Retirement planning

D) Education for children

Q. 7	The theory suggesting that consumers smooth out their consumption over time is:
	A) Relative Income Hypothesis
	B) Permanent Income Hypothesis
	C) Life-Cycle Hypothesis
	D) Absolute Income Hypothesis
	Answer: B
Q. 8	If consumption patterns barely change in response to short-term income fluctuations, this supports:
	A) Absolute Income Hypothesis
	B) Relative Income Hypothesis
	C) Permanent Income Hypothesis
	D) Life-Cycle Hypothesis
	Answer: C
Q. 9	Which hypothesis is rooted in the idea that people are forward-looking and base decisions on future expectations?
	A) Relative Income Hypothesis
	B) Absolute Income Hypothesis
	C) Permanent Income Hypothesis
	D) Life-Cycle Hypothesis
	Answer: D

Answer: C

Q. 9

Which hypothesis is rooted in the idea that people are forward-looking and base decisions on future expectations?

A) Relative Income Hypothesis

B) Absolute Income Hypothesis

C) Permanent Income Hypothesis

D) Life-Cycle Hypothesis

Answer: D

Q. 10

In the Relative Income Hypothesis, if a person's income increases but everyone else's does too, their consumption will:

A) Increase significantly

B) Decrease

C) Stay the same

D) Fluctuate unpredictably

Answer: C

Development Economics

Q. 1	Which of the following best describes economic growth?
	A. Increase in real output of an economy
	B. Increase in the standard of living
	C. Increase in the literacy rate
	D. Decrease in poverty rate
	Answer: A. Increase in real output of an economy
Q. 2	Economic development is primarily concerned with:
	A. Quantitative change
	B. Qualitative change
	C. Increase in GDP
	D. Increase in industrial production
	Answer: B. Qualitative change
Q. 3	Which indicator would more likely reflect economic development?
	A. Stock market index
	B. Increase in GDP
	C. Human Development Index (HDI)
	D. Production of steel
	Answer: C. Human Development Index (HDI)

Q. 4	Economic growth can be best represented by:
	A. Increase in literacy rate
	B. Decline in infant mortality
	C. Growth in GDP per capita
	D. Decrease in income inequality
	Answer: C. Growth in GDP per capita
Q. 5	Which is NOT a typical consequence of economic growth?
	A. Higher production
	B. Greater employment opportunities
	C. Better healthcare facilities
	D. Improved political stability
	Answer: D. Improved political stability
Q. 6	Economic development involves:
	A. Only quantitative progress
	B. Only qualitative progress
	C. Both quantitative and qualitative progress
	D. Neither quantitative nor qualitative progress
	Answer: C. Both quantitative and qualitative progress

Q. 7	Which of the following focuses more on the well-being of people?
	A. Economic growth
	B. Economic development
	C. Gross Domestic Product
	D. Inflation rate
	Answer: B. Economic development
Q. 8	If a country's GDP increases, but poverty and unemployment rates remain high, this indicates:
	A. Economic development
	B. Economic growth
	C. Neither growth nor development
	D. Both growth and development
	Answer: B. Economic growth
Q. 9	A country with an improved education system, better healthcare, and reduced poverty but with stagnant industrial production is likely experiencing:
	A. Economic growth
	B. Economic stagnation
	C. Economic development
	D. Economic recession
	Answer: C. Economic development

Q. 9	A country with an improved education system, better healthcare, and reduced poverty but with stagnant industrial production is likely experiencing:
	A. Economic growth
	B. Economic stagnation
	C. Economic development
	D. Economic recession
	Answer: C. Economic development
Q. 10	Which of the following metrics best represents economic development?
	A. Increase in exports
	B. Decline in imports
	C. Improved quality of life metrics
	D. Expansion of manufacturing sector
	Answer: C. Improved quality of life metrics

Natural Resource and Environmental Ec

Q. 1	What is the primary focus of natural resources and environmental economics?
	a) Maximizing corporate profits
	b) Minimizing government intervention
	c) Analyzing the economic aspects of environmental problems
	d) Promoting rapid industrialization
	Answer: c) Analyzing the economic aspects of environmental problems
Q. 2	Which of the following is considered a natural resource?
	a) A laptop
	b) Clean air
	c) A shopping mall
	d) A car manufacturing plant
	Answer: b) Clean air
Q. 3	What is the economic term for the depletion of a natural resource due to excessive use?
	a) Sustainable management
	b) Natural resource preservation
	c) Resource degradation
	d) Environmental conservation
	Answer: c) Resource degradation

Q. 4	Which environmental issue is associated with the loss of biodiversity and habitat destruction?
	a) Desertification
	b) Soil erosion
	c) Deforestation
	d) Species extinction
	Answer: d) Species extinction
Q. 5	Which economic concept refers to the value of natural resources and ecosystems in providing essential services to human society?
	a) Gross Domestic Product (GDP)
	b) Consumer surplus
	c) Environmental capital
	d) Inflation rate
	Answer: c) Environmental capital
Q. 6	What does the “tragedy of the commons” refer to in the context of natural resource economics?
	a) The overuse and depletion of shared resources
	b) Government ownership of all resources
	c) Private ownership of all resources
	d) Successful management of common resources
	Answer: a) The overuse and depletion of shared resources

Q. 7	Which of the following is NOT a major greenhouse gas responsible for global warming?
	a) Carbon dioxide (CO ₂)
	b) Methane (CH ₄)
	c) Nitrogen oxide (NO ₂)
	d) Chlorofluorocarbons (CFCs)
	Answer: c) Nitrogen oxide (NO ₂)
Q. 8	What is the economic term for the costs imposed on society as a result of pollution or environmental damage?
	a) Private costs
	b) Social costs
	c) External costs
	d) Internal costs
	Answer: c) External costs
Q. 9	Which economic approach advocates assigning property rights to natural resources to promote sustainable management?
	a) Command and control regulation
	b) Cap and trade system
	c) Coase theorem
	d) Pigouvian taxation
	Answer: c) Coase theorem

Q. 9	Which economic approach advocates assigning property rights to natural resources to promote sustainable management?
	a) Command and control regulation
	b) Cap and trade system
	c) Coase theorem
	d) Pigouvian taxation
	Answer: c) Coase theorem
Q. 10	What is the primary goal of carbon pricing mechanisms like carbon taxes and cap-and-trade systems?
	a) To eliminate carbon emissions entirely
	b) To incentivize businesses to pollute more
	c) To reduce greenhouse gas emissions
	d) To promote economic growth at any cost
	Answer: c) To reduce greenhouse gas emissions

Econometrics

Q. 1 What is the primary focus of an economic model?

- a) Estimating parameters
- b) Explaining economic phenomena
- c) Fitting data to a curve
- d) Conducting hypothesis tests

Answer: b) Explaining economic phenomena

Q. 2 What is the primary focus of an econometric model?

- a) Predicting future economic trends
- b) Describing economic theories
- c) Testing economic hypotheses
- d) Generating economic data

Answer: c) Testing economic hypotheses

Q. 3 Which type of model aims to capture real-world economic relationships and mechanisms?

- a) Economic model
- b) Econometric model
- c) Statistical model
- d) Mathematical model

Answer: a) Economic model

Q. 4	Which type of model uses statistical techniques to estimate parameters and test hypotheses about economic relationships?
	a) Economic model
	b) Econometric model
	c) Structural model
	d) Descriptive model
	Answer: b) Econometric model
Q. 5	What is the primary purpose of an economic model?
	a) Describing historical data
	b) Providing predictions for policy decisions
	c) Estimating model parameters
	d) Testing statistical hypotheses
	Answer: b) Providing predictions for policy decisions
Q. 6	What is the primary purpose of an econometric model?
	a) Developing economic theories
	b) Predicting future economic trends
	c) Testing hypotheses about economic relationships
	d) Generating economic data
	Answer: c) Testing hypotheses about economic relationships

Q. 7	Which type of model is more concerned with theoretical concepts and economic principles?
	a) Economic model
	b) Econometric model
	c) Descriptive model
	d) Predictive model
	Answer: a) Economic model
Q. 8	Which type of model is more concerned with empirical analysis and data-driven insights?
	a) Economic model
	b) Econometric model
	c) Theoretical model
	d) Predictive model
	Answer: b) Econometric model
Q. 9	Which type of model typically uses mathematical equations and symbols to represent economic relationships?
	a) Economic model
	b) Econometric model
	c) Descriptive model
	d) Predictive model
	Answer: a) Economic model

Q. 9	Which type of model typically uses mathematical equations and symbols to represent economic relationships?
	a) Economic model
	b) Econometric model
	c) Descriptive model
	d) Predictive model
	Answer: a) Economic model
Q. 10	Which type of model typically uses statistical methods and data to estimate parameters?
	a) Economic model
	b) Econometric model
	c) Theoretical model
	d) Predictive model
	Answer: b) Econometric model

Research Methods in Agricultural Economics

Q. 1	What is the primary goal of sampling in agricultural economics research?
	a) To include as many data points as possible
	b) To ensure the sample represents the population of interest
	c) To minimize data collection costs
	d) To eliminate outliers from the dataset
	Correct Answer: b) To ensure the sample represents the population of interest
Q. 2	Which of the following is a qualitative research data collection method?
	a) Surveys
	b) Experiments
	c) Interviews
	d) Observations
	Correct Answer: c) Interviews
Q. 3	Which sampling method involves selecting every nth item from a list or population?
	a) Simple random sampling
	b) Stratified sampling
	c) Systematic sampling
	d) Cluster sampling

Correct Answer: c) Systematic sampling

Q. 4 What is purposive sampling in qualitative research?

a) Selecting participants randomly

b) Selecting participants based on their availability

c) Selecting participants based on specific characteristics or expertise

d) Selecting participants based on their age and gender

Correct Answer: c) Selecting participants based on specific characteristics or expertise

Q. 5 Which of the following is an advantage of stratified sampling?

a) It is simple to implement

b) It reduces sampling bias

c) It is suitable for small populations

d) It requires a large sample size

Correct Answer: b) It reduces sampling bias

Q. 6 In qualitative research, what is the purpose of data saturation?

a) To minimize the sample size

b) To reach a point where no new information is obtained

c) To select a representative sample

d) To ensure data collection is ongoing

Correct Answer: b) To reach a point where no new information is

Q. 7	What is the main advantage of using open-ended questions in qualitative interviews?
	a) They save time
	b) They provide structured responses
	c) They allow for in-depth exploration of topics
	d) They are easy to analyze
	Correct Answer: c) They allow for in-depth exploration of topics
Q. 8	Which of the following is a probability sampling method?
	a) Convenience sampling
	b) Snowball sampling
	c) Quota sampling
	d) Simple random sampling
	Correct Answer: d) Simple random sampling
Q. 9	What is the purpose of pilot testing a questionnaire?
	a) To finalize the research design
	b) To identify and correct issues with the questionnaire
	c) To analyze the data collected
	d) To select the research participants
	Correct Answer: b) To identify and correct issues with the questionnaire

Q. 9	What is the purpose of pilot testing a questionnaire?
	a) To finalize the research design
	b) To identify and correct issues with the questionnaire
	c) To analyze the data collected
	d) To select the research participants
	Correct Answer: b) To identify and correct issues with the questionnaire
Q. 10	Which of the following is an example of a closed-ended question in a survey?
	a) "How do you feel about climate change?"
	b) "What is your age?"
	c) "Can you describe your experience in detail?"
	d) "Tell me more about your preferences."
	Correct Answer: b) "What is your age?"

Operational Research

Q. 1	What is the primary objective of Operations Research (OR)?
	a) Optimizing resources.
	b) Financial analysis.
	c) HR recruitment.
	d) Marketing strategies.
	Answer: a) Optimizing resources.
Q. 2	Which field does NOT typically benefit from the application of OR techniques?
	a) Logistics.
	b) Literature.
	c) Manufacturing.
	d) Finance.
	Answer: b) Literature.
Q. 3	Which term best describes the process of using mathematical models to aid in decision-making?
	a) Operations Management.
	b) Operational Research.
	c) Financial Modeling.
	d) Resource Allocation.

Answer: b) Operational Research.

- Q. 4** The simplex method is most commonly associated with:
- a) Decision trees.
 - b) Network analysis.
 - c) Linear programming.
 - d) Game theory.

Answer: c) Linear programming.

- Q. 5** The Monte Carlo simulation is best described as:
- a) A deterministic method.
 - b) A probability distribution.
 - c) A random sampling technique.
 - d) A linear programming method.

Answer: c) A random sampling technique.

- Q. 6** Queuing theory is most useful for:
- a) Optimizing production schedules.
 - b) Understanding waiting line phenomena.
 - c) Budget allocation.
 - d) Game strategy.

Answer: b) Understanding waiting line phenomena.

Q. 7	Which of the following problems can be addressed using linear programming?
	a) Maximizing profits with limited resources.
	b) Predicting stock prices.
	c) Designing marketing campaigns.
	d) Qualitative research.
	Answer: a) Maximizing profits with limited resources.
Q. 8	Decision theory is primarily concerned with:
	a) Decision-making under certainty.
	b) Decision-making under risk.
	c) Decision-making under uncertainty.
	d) All of the above.
	Answer: d) All of the above.
Q. 9	How does OR aid in managerial decision-making?
	a) By providing subjective insights.
	b) By offering qualitative feedback.
	c) By offering objective, quantitative solutions.
	d) By basing decisions on intuition.
	Answer: c) By offering objective, quantitative solutions.

Q. 9	How does OR aid in managerial decision-making?
	a) By providing subjective insights.
	b) By offering qualitative feedback.
	c) By offering objective, quantitative solutions.
	d) By basing decisions on intuition.
	Answer: c) By offering objective, quantitative solutions.
Q. 10	Transportation models in OR help in:
	a) Deciding optimal routes.
	b) Allocating budgets.
	c) Product design.
	d) Organizational structuring.
	Answer: a) Deciding optimal routes.

International Agricultural Trade

Q. 1	Which trade policy instrument aims to reduce the quantity of imported goods and protect domestic industries?
	a) Export subsidies
	b) Import tariffs
	c) Quotas
	d) Trade liberalization
	Correct Answer: b) Import tariffs
Q. 2	When a country imposes an import quota, what is the likely effect on the welfare of domestic consumers?
	a) Welfare increases
	b) Welfare decreases
	c) No change in welfare
	d) Welfare depends on other factors
	Correct Answer: b) Welfare decreases
Q. 3	What trade policy instrument is designed to promote domestic industries by lowering the cost of production?
	a) Export subsidies
	b) Import tariffs
	c) Quotas
	d) Voluntary export restraints

Correct Answer: a) Export subsidies

Q. 4 If a country imposes a specific tariff, what is the tax amount based on?

- a) Percentage of the imported good's value
- b) Fixed amount per unit of the imported good
- c) Weight of the imported good
- d) None of the above

Correct Answer: b) Fixed amount per unit of the imported good

Q. 5 What trade policy instrument allows for the temporary suspension of trade barriers under certain conditions?

- a) Preferential trade agreement
- b) Most-favored-nation status
- c) Trade liberalization
- d) Trade remedies

Correct Answer: a) Preferential trade agreement

Q. 6 Which of the following is an example of a non-tariff trade barrier?

- a) Import quotas
- b) Export subsidies
- c) Most-favored-nation status
- d) Voluntary export restraints

Correct Answer: a) Import quotas

Q. 7 When a country uses a voluntary export restraint (VER) on a trading partner, what is the primary objective?

- a) To limit the quantity of imports
- b) To increase the quantity of imports
- c) To reduce export subsidies
- d) To encourage trade liberalization

Correct Answer: a) To limit the quantity of imports

Q. 8 Which trade policy instrument is aimed at preventing unfair trade practices such as dumping?

- a) Import tariffs
- b) Countervailing duties
- c) Quotas
- d) Export subsidies

Correct Answer: b) Countervailing duties

Q. 9 What is the main purpose of a trade embargo?

- a) To promote free trade
- b) To restrict trade with specific countries
- c) To reduce import tariffs
- d) To encourage import quotas

Q. 9	What is the main purpose of a trade embargo?
	a) To promote free trade
	b) To restrict trade with specific countries
	c) To reduce import tariffs
	d) To encourage import quotas
	Correct Answer: b) To restrict trade with specific countries
Q. 10	How does trade liberalization generally impact the welfare of trading partners?
	a) It decreases welfare for both partners
	b) It increases welfare for both partners
	c) It increases welfare for one partner and decreases it for the other
	d) It has no impact on welfare
	Correct Answer: b) It increases welfare for both partners

Agricultural Marketing

Q. 1	What is the primary purpose of organizing measurements in research?
	a) To categorize data
	b) To analyze data
	c) To validate hypotheses
	d) To facilitate precise and systematic data collection
	Answer: d
Q. 2	Which of the following is NOT a level of measurement?
	a) Nominal
	b) Interval
	c) Decibel
	d) Ratio
	Answer: c
Q. 3	What does a nominal scale measure?
	a) Frequency
	b) Categories without order
	c) Equal intervals
	d) Absolute zero point
	Answer: b

Q. 4	Which measurement scale has an absolute zero point?
	a) Ordinal
	b) Interval
	c) Nominal
	d) Ratio
	Answer: d
Q. 5	In which level of measurement are data classified into categories that can be ranked?
	a) Nominal
	b) Ordinal
	c) Interval
	d) Ratio
	Answer: b
Q. 6	Which of the following best describes an interval scale?
	a) It has a definite zero point.
	b) It measures the order of data.
	c) It classifies data into categories.
	d) It measures the distance between intervals.
	Answer: d

Q. 7	Why is measurement crucial in research?
	a) It helps in quantifying observations
	b) It makes the research more complicated
	c) It is always required for research approval
	d) It facilitates publication
	Answer: a
Q. 8	What is the main difference between ordinal and interval scales?
	a) Ordinal has a definite zero, but Interval does not.
	b) Ordinal measures categories, while Interval measures frequency.
	c) Ordinal ranks data, whereas Interval measures distance between data.
	d) There is no difference.
	Answer: c
Q. 9	What kind of measurement tool would best measure the preference ranking of agricultural products by taste?
	a) Nominal
	b) Ordinal
	c) Interval
	d) Ratio
	Answer: b

Q. 9	What kind of measurement tool would best measure the preference ranking of agricultural products by taste?
	a) Nominal
	b) Ordinal
	c) Interval
	d) Ratio
	Answer: b
Q. 10	Which scale of measurement is used for data that can be categorized and ranked, but distances between ranks are not equal?
	a) Nominal
	b) Ratio
	c) Ordinal
	d) Interval
	Answer: c

Agricultural Project Planning and Analysis

Q. 1	What does SWOT stand for in SWOT analysis?
	A) Strength, Weakness, Objective, Target
	B) Strength, Weakness, Opportunity, Threat
	C) Simple, Workable, Operational, Tested
	D) Study, Work, Observe, Train
	Answer: B
Q. 2	Which of the following is NOT a phase in project planning?
	A) Initiation
	B) Planning
	C) Execution
	D) Analysis
	Answer: D
Q. 3	What is the primary goal of a feasibility study?
	A) To calculate profits
	B) To assess the viability of a project
	C) To identify potential competitors
	D) To plan the project's execution
	Answer: B

Q. 4	Which of these is NOT a type of cost in project planning?
	A) Fixed cost
	B) Variable cost
	C) Depreciation cost
	D) Emotional cost
	Answer: D
Q. 5	What is the term used for a detailed plan to achieve a project's goals?
	A) Business Model
	B) Business Plan
	C) Cost-benefit Analysis
	D) SWOT Analysis
	Answer: B
Q. 6	What does PESTLE analysis stand for?
	A) Political, Economic, Societal, Technological, Legal, Environmental
	B) Public, Economy, Strategy, Technology, Law, Environment
	C) Practical, Economic, Systematic, Tactical, Logistic, Execution
	D) Project, Economic, Sustainable, Technology, Labor, Expertise
	Answer: A

Q. 7	What is the purpose of a break-even analysis?
	A) To determine the project's profitability
	B) To identify the point where revenues equal costs
	C) To identify potential risks
	D) To assess project sustainability
	Answer: B
Q. 8	Which technique is used to evaluate the time required to complete each task in a project?
	A) SWOT Analysis
	B) PERT Analysis
	C) Cost-Benefit Analysis
	D) Gantt Chart
	Answer: B
Q. 9	What does ROI stand for?
	A) Rate of Inflation
	B) Return on Information
	C) Range of Interest
	D) Return on Investment
	Answer: D

Q. 9 What does ROI stand for?

A) Rate of Inflation

B) Return on Information

C) Range of Interest

D) Return on Investment

Answer: D

Q. 10 What is a Gantt Chart primarily used for?

A) Budgeting

B) Scheduling

C) Risk Assessment

D) Market Analysis

Answer: B

Farming Systems and Livelihood Analysis

Q. 1	What is the primary purpose of a systems approach in agricultural research and development?
	A) To break down complex problems
	B) To promote a single cropping method
	C) To analyze parts in isolation
	D) To understand interrelationships and interactions
	Answer: D
Q. 2	In a systems approach, which term describes the interconnected elements that form a whole?
	A) Silos
	B) Components
	C) Units
	D) Entities
	Answer: B
Q. 3	Which principle best describes the holistic nature of a systems approach?
	A) The whole is equal to the sum of its parts
	B) The whole is greater than the sum of its parts
	C) The whole is less than the sum of its parts
	D) The whole is indifferent to its parts

Answer: B

Q. 4 Feedback loops in a farming system are essential to:

- A) Isolate problems
- B) Maintain stability
- C) Reduce diversity
- D) Promote uniformity

Answer: B

Q. 5 In the context of a systems approach, what does "emergent property" refer to?

- A) Properties that disappear when the system is broken down
- B) Properties that only arise when parts are viewed in isolation
- C) Properties that arise from the interplay of components within a system
- D) Properties inherent to individual components

Answer: C

Q. 6 Why is the concept of resilience critical in the systems approach for farming?

- A) It promotes single crop growth
- B) It reduces the need for fertilizers
- C) It helps systems absorb shocks and disturbances
- D) It simplifies complex issues

Q. 7	A boundary in a systems approach primarily helps in:
	A) Eliminating external factors
	B) Defining the scope of the system under study
	C) Reducing the system's complexity
	D) Ignoring feedback loops
	Answer: B
Q. 8	Which approach is best suited for analyzing the interdependencies among various elements in farming systems?
	A) Linear analysis
	B) Reductionist approach
	C) Systems approach
	D) Component analysis
	Answer: C
Q. 9	Livelihood diversification in the context of a systems approach refers to:
	A) Reducing income sources for stability
	B) Relying on a single cash crop
	C) Promoting a range of economic activities to spread risk
	D) Ignoring local market demands
	Answer: C

Q. 9	Livelihood diversification in the context of a systems approach refers to:
	A) Reducing income sources for stability
	B) Relying on a single cash crop
	C) Promoting a range of economic activities to spread risk
	D) Ignoring local market demands
	Answer: C
Q. 10	In a farming system analysis, which is NOT a typical level of study?
	A) Farm household
	B) Individual crops
	C) Village or community
	D) Global climate patterns
	Answer: D

Q. 1	What is the primary goal of farm management?
	a) Maximizing profit
	b) Minimizing costs
	c) Increasing yield
	d) Reducing risk
	Correct Answer: a) Maximizing profit
Q. 2	Which of the following is not considered a resource in farm management?
	a) Land
	b) Labor
	c) Weather
	d) Capital
	Correct Answer: c) Weather
Q. 3	What is the term for the relationship between inputs and outputs in farm production?
	a) Farm efficiency
	b) Farm productivity
	c) Farm profitability
	d) Farm sustainability
	Correct Answer: b) Farm productivity

Q. 4	Which production relationship indicates the maximum output that can be achieved with a given set of inputs?
	a) Isoquant
	b) Isocost
	c) Isohyet
	d) Isobar
	Correct Answer: a) Isoquant
Q. 5	In farm management, what does the term "marginal product" refer to?
	a) The additional cost of one more unit of input
	b) The additional output from one more unit of input
	c) The total cost of all inputs
	d) The total output of the farm
	Correct Answer: b) The additional output from one more unit of input
Q. 6	Which of the following production relations focuses on minimizing production costs for a given level of output?
	a) Isoquant
	b) Isocost
	c) Isobar
	d) Isohyet
	Correct Answer: b) Isocost

Q. 7	In farm management, what is the objective of an isoprofit curve?
	a) To maximize output
	b) To minimize costs
	c) To achieve a specific profit level
	d) To reduce risk
	Correct Answer: c) To achieve a specific profit level
Q. 8	Which resource is considered the most limiting factor in agriculture?
	a) Land
	b) Labor
	c) Capital
	d) Technology
	Correct Answer: a) Land
Q. 9	What is the term for the relationship between the quantity of a resource and the level of output?
	a) Production function
	b) Cost function
	c) Revenue function
	d) Profit function
	Correct Answer: a) Production function

Q. 9	What is the term for the relationship between the quantity of a resource and the level of output?
	a) Production function
	b) Cost function
	c) Revenue function
	d) Profit function
	Correct Answer: a) Production function
Q. 10	Which of the following is a fixed input in the short run for a farm?
	a) Fertilizer
	b) Machinery
	c) Labor
	d) Land
	Correct Answer: d) Land
