Answer: B

76. A firm shifts a large portion of its marketing budget from television advertising to targeted digital campaigns, direct marketing, and sales promotions. This change reflects a broader trend in the marketing environment. Which of the following best explains this shift?

- A. Decreasing competition in retail markets
- B. Increased effectiveness and lower cost of targeted communication tools
- C. Decline in consumer use of digital media
- D. Reduced need for customer data in marketing decisions

Answer: B

77. A company launches an advertising campaign using complex technical language to promote a new product. However, the target audience fails to understand the message because they are unfamiliar with the terminology. Which element of the communication process is MOST responsible for this failure?
- A. Channel selection
 - B. Noise due to lack of shared field of experience
 - C. Feedback mechanism
 - D. Receiver response

Answer: B

78. A firm selling high-priced industrial machinery provides detailed product specifications, technical comparisons, and performance data in its advertisements. The target customers actively search for and evaluate this information before making a purchase. Which response hierarchy model BEST describes this situation?
- A. Low-involvement hierarchy (learn → do → feel)
 - B. Dissonance/attribution hierarchy (do → feel → learn)
 - C. Standard learning hierarchy (learn → feel → do)
 - D. Peripheral route to persuasion

Answer: C

79. A new detergent brand enters a highly competitive market where many brands appear similar in quality and features. The company launches an advertising campaign using emotional storytelling combined with a unique brand personality and heavy media exposure. Which of the following BEST explains the rationale behind this strategy?
- A. The company is focusing on primary demand to educate consumers about detergents
 - B. The company is attempting to differentiate an undifferentiated product through emotional and image-based appeals
 - C. The company is reducing advertising clutter by minimizing media exposure
 - D. The company is targeting industrial buyers with technical expertise appeals

Answer: B

80. A company conducts pretesting for its advertisement and finds that consumers remember the humorous scenes but cannot recall the product features or brand name. Despite high attention levels, sales do not improve after the campaign launch. Based on advertising principles, what is the MOST likely reason for this outcome?
- A. The campaign used too much reach and frequency
 - B. The humor in the advertisement distracted from the core message and reduced message comprehension
 - C. The advertisement relied too heavily on rational appeals
 - D. The media selection failed to achieve sufficient impressions

Answer: B

81. A company selling highly technical industrial equipment replaces most of its advertising budget with a trained sales force composed of engineers who interact directly with client firms to diagnose and solve their operational problems. Which of the following BEST justifies this decision?

- A. Advertising is more cost-effective in industrial markets
- B. Personal selling allows tailored solutions and technical problem-solving that mass communication cannot provide
- C. Industrial buyers prefer emotional appeals over factual information
- D. Personal selling eliminates the need for customer feedback

Answer: B

82. A consumer goods company shifts from using door-to-door salespeople to digital direct marketing campaigns (email and SMS). However, sales decline because many messages are sent to outdated or irrelevant contacts. Which limitation of direct marketing is MOST evident in this situation?

- A. Poor reach
- B. Image problem
- C. Accuracy of database/lists
- D. Lack of flexibility

Answer: C

83. A firm combines mass advertising to create awareness for a new product and then deploys a sales force to visit interested customers, demonstrate the product, and close sales. What is the MOST appropriate explanation for this integrated approach?

- A. Personal selling is more effective in the early stages of the response hierarchy
- B. Advertising replaces the need for personal selling in all stages
- C. Advertising creates awareness, while personal selling is effective in later stages such as trial and purchase
- D. Personal selling is used only when advertising fails completely

Answer: C

84. A company encourages its salespeople to adjust their sales presentations based on each customer's needs. However, management later discovers that different customers are receiving inconsistent and sometimes misleading information. Which disadvantage of personal selling is MOST clearly illustrated?

- A. High cost of sales calls
- B. Limited reach of sales force
- C. Inconsistent messaging due to lack of standardization
- D. Lack of customer interaction

Answer: C

85. A beverage company launches a coupon campaign to attract new customers. However, after the campaign, sales increased only slightly, and most redeemed coupons were used by existing loyal customers. What is the MOST appropriate explanation for this outcome?

- A. Coupons are ineffective for all types of products
- B. Coupons mainly attract price-sensitive consumers, including current users rather than new customers
- C. Coupons increase brand loyalty significantly among new users
- D. Coupons are more effective than sampling in generating immediate trial

Answer: B

86. A new cosmetic brand distributes free samples in supermarkets. Although many consumers try the product, repeat purchases remain very low. Which of the following BEST explains this situation?

- A. Sampling is ineffective in generating trial
- B. The product likely lacks distinctive or superior benefits to sustain repeat purchase
- C. Sampling is too expensive to influence consumer behavior
- D. The purchase cycle for cosmetics is too short

Answer: B

87. A manufacturer offers large trade allowances to retailers to stock its new product. Retailers agree to carry the product, but they do not actively promote or display it in stores. Which of the following is the MOST likely reason?

- A. Trade allowances automatically ensure strong retail support
- B. Retailers prioritize products with higher consumer demand or additional promotional support
- C. Trade promotions are only effective for established brands
- D. Retailers do not respond to financial incentives

Answer: B

88. A company uses public relations (PR) to promote a new service through press releases and media coverage. The campaign gains wide attention, but many consumers do not associate the message with the company. Which limitation of public relations is MOST clearly illustrated?

- A. High cost of PR campaigns
- B. Lack of credibility of PR messages
- C. Difficulty in controlling media and ensuring message-source linkage
- D. Inability to reach large audiences

Answer: C

89. A company decides to evaluate its advertising campaign before launching it in the market. The main purpose is to identify possible weaknesses in the message and avoid wasting resources on an ineffective campaign. Which of the following BEST explains why the company is conducting this evaluation?

- A. To eliminate the need for post testing after the campaign

- B. To avoid costly mistakes and improve the effectiveness before full implementation
- C. To measure competitors' advertising performance
- D. To increase the creativity of the advertising agency without restrictions

Answer: B

90. Which of the following best describes the concept of **strategic marketing**?

- A. Focusing only on increasing sales through aggressive promotion
- B. Analyzing market opportunities and developing long-term strategies
- C. Producing goods at the lowest possible cost
- D. Improving product features without considering customer needs

Answer: B

91. A diversified company evaluates its business units and finds that one unit has high market growth but low relative market share, requiring heavy investment with uncertain future returns. According to the **BCG Growth-Share Matrix**, which strategy is most appropriate if the firm decides to increase its market share?

- A. Hold strategy
- B. Harvest strategy
- C. Build strategy
- D. Divest strategy

Answer: C

92. A company conducts market research to understand customer needs, selects a target segment, positions its product, and then designs the marketing mix (product, price, place, promotion). Which stage of the **marketing process** is the company primarily engaged in?

- A. Developing marketing strategies
- B. Analyzing market opportunities
- C. Planning marketing programs
- D. Managing the marketing effort

Answer: A

93. Which of the following is **true** about major entry barriers?

- A. Low asset-salvage value due to over specialization
- B. Lack of alternative opportunities
- C. Legal or moral obligations to customers
- D. Patents and licensing requirements

Answer: D

94. A small local company cannot compete directly with a market leader due to limited resources. Instead, it identifies underserved customer segments and targets them with specialized products. Which competitive strategy is the firm most likely using?
- A. Frontal attack strategy
 - B. Encirclement strategy
 - C. Flank attack strategy
 - D. Contraction defense strategy

Answer: C

95. A company systematically studies demographic trends, economic conditions, cultural shifts, and technological changes to identify external opportunities and threats. Which analytical tool is the company primarily using?
- A. SWOT Analysis
 - B. PEST Analysis
 - C. Marketing Mix Analysis
 - D. Value Chain Analysis

Answer: B

96. A firm identifies that it has strong R&D capability but lacks effective distribution channels, while the market shows high growth potential with increasing competition. Which strategic action best reflects effective use of **SWOT Analysis**?
- A. Ignore weaknesses and focus only on strengths
 - B. Focus only on threats to avoid risk
 - C. Match strengths with opportunities to develop new products
 - D. Treat all weaknesses equally regardless of importance

Answer: C

97. A company conducts a comprehensive, systematic, independent, and periodic review of its marketing environment, strategies, and activities, followed by actionable recommendations. Which of the following best describes the primary purpose of a marketing audit?
- A. To increase short-term sales immediately
 - B. To evaluate only financial performance
 - C. To replace strategic planning
 - D. To identify problems and opportunities

Answer: D

- 98.** A premium hotel in Addis Ababa redesigns its offering by improving room quality, introducing personalized guest services, and strengthening its brand image. It also adds airport pickup and 24/7 support to enhance customer experience. Which level of the product is the hotel MOST directly strengthening through these additional services?
- A.** Core product
 - B.** Actual product
 - C.** Augmented product
 - D.** Generic product

Answer: C

- 99.** A smartphone company introduces a high-quality device with advanced features and sets a relatively high price to reflect innovation, brand prestige, and superior performance. The company aims to position itself as a premium brand. Which pricing objective is the company primarily pursuing?
- A.** Product quality leadership
 - B.** Survival pricing
