

1. The competitive structure of an industry is clearly "attractive" except \* 1 point

- ☐ A. Entry barriers are relatively high
- ☐ B. Rivalry among sellers is moderate
- ☒ C. Few threat from substitute products
- ☐ D. The industry customers have strong bargaining power

2. Conglomerate diversification \* 1 point

- ☐ A. Permits building competitive advantage via cost sharing but not through skill transfer
- ☐ B. Is primarily a financial approach to diversification where value accrues from spreading risk across more businesses
- ☐ C. Is more likely to result in increasing shareholders value than is related diversification
- ☒ D. Is more attractive to multinational companies than to domestic -only companies

3. The business level strategy of an organization encompasses \* 1 point

- ☐ A. The overall competitive theme that the organization intends to pursue
- ☐ B. The answer to the question: "What business should we be in?"

15. "Regression analysis was applied between \$ sales (y) and \$ advertising (x) across all the branches of a major international corporation. The following regression function was obtained.  $\hat{y} = 5000 + 7.25x$ . If the advertising budgets of two branches of the corporation differ by \$30,000, then what will be the predicted difference in their sales?" \* 1 point

☐ A. \$217,500

☐ B. \$222,500

☐ C. \$5,000

☐ D. \$7.25

16. When the researcher wants to locate and consider resource persons with experience of the subject under study, which sampling method do you recommend? \* 1 point

☐ A. Purposive sampling

☐ B. Snow ball sampling

☐ C. Quota sampling

☐ D. Stratified sampling

17. Which of the following represents the main section of a research \* 1 point

6. W/ro Hellen, an owner manager of aqua peace Natural mineral water, is \* 1 po  
planning to pursue with a strategic management act for her business  
enterprise. The initial step to be undertaken under her endeavor is:

- ☐ A. Strategy Formulation
- ☐ B. Environmental Scanning
- ☐ C. Strategy Implementation
- ☐ D. Setting Vision and Mission

7. In the textile industry, a manufacturer is interested in the number of \* 1 point  
blemishes or flaws occurring in each 100 feet of material. The probability  
distribution that has the greatest chance of applying to this situation is:

- ☐ A. Normal
- ☐ B. Binomial
- ☐ C. Poisson
- ☐ D. Exponential

8. The fill amount of bottles of soft drink has been found to be normally \* 1 point  
distributed with a mean of 2.0 liters and a standard deviation of 0.50 liter.  
Bottle that contain less than 1.90 liters can make the manufacturer subject

Set as default

10. The production manager at a textile mill believes that a new machine producing cloth is not working according to the company's specifications. The company requires that the cloth should have a mean breaking strength of 6 Kg. A sample of 60 pieces of cloth reveals a sample mean breaking strength of 13.1 Kg and a standard deviation of 0.3 Kg. The test statistic for this scenario is \* 1 po

- ☐ A. 1.96
- ☐ B. 23.67
- ☐ C. 183.32
- ☐ D. 32.01

11. One of the following is not the use of statistics. Which one is it? 1 point

- ☐ A. It present facts in a definite and precise form
- ☐ B. It helps assess the relationship between two or more variables
- ☐ C. It helps forecast future events
- ☐ D. It helps analyze qualitative data to capture themes and patterns.

12. A property of a point estimator that occurs whenever larger sample sizes tend to provide point estimates closer to the population parameter is known as? \* 1 point

19. Which of the following is not something a researcher will have to consider when thinking about the sample size? \* 1 point

- ☐ A. Time and cost.
- ☐ B. Non-response rate.
- ☐ C. Length of questionnaire.
- ☐ D. Heterogeneity of population.

20. The basis of classifying research based on applicability or purpose of the research outcomes results in \* 1 point

- ☐ A. Quantitative or qualitative research
- ☐ B. Basic or applied research
- ☐ C. Descriptive, explorative or explanatory research
- ☐ D. Conceptual or empirical research

21. The person most responsible for popularizing interchangeable parts in manufacturing was \* 1 point

- ☐ A. Frederick Winslow Taylor
- ☐ B. Eli Whitney
- ☐ C. Elton Mayo

According to a survey, 75% of all customers will return to the same grocery store. Suppose eight customers are selected at random, what is the probability that exactly five of the customers will return? \* 1 point

☐ A. 0.0467

☐ B. 0.2076

☐ C. 0.2541

☐ D. 0.5001

14. Which of the following variables can be analyzed using the Chi-square test? \* 1 point

☐ A. Sex

☐ B. Wealth index

☐ C. Educational level

☐ D. Number of customer complaints per week.

15. "Regression analysis was applied between \$ sales (y) and \$ advertising (x) across all the branches of a major international corporation. The following regression function was obtained.  $\hat{y} = 5000 + 7.25x$ . If the advertising budgets of two branches of the corporation differ by \$30,000, then what will be the predicted difference in their sales?" \* 1 point

☐ A. \$217,500

☐ B. \$222,500

17. Which of the following represents the main section of a research proposal? ★ 1 point

- ☐ A. Introduction, Literature Review, Methodology, Research findings.
- ☐ B. Introduction, Literature Review, Methodology, Research findings, Recommendation.
- ☐ C. Acknowledgement, Introduction, Literature Review, Methodology, Bibliography.
- ☐ D. Introduction, Literature Review, Methodology, Time and Cost budget, Bibliography.

18. Descriptive research can do the following except: ★ 1 point

- ☐ A. Description of population characteristics.
- ☐ B. Estimates of frequency of characteristics.
- ☐ C. Understanding a phenomenon in terms of conditional statements of the form "if x, then y."
- ☐ D. Discovery of association among variables.

19. Which of the following is not something a researcher will have to consider when thinking about the sample size? ★ 1 point

- ☐ A. Time and cost.
- ☐ B. Non-response rate.

54. Refereeing to information presented on the above question, which option has to be chosen based on insufficient reason ?

\* 1 po

- ☐ A. Use over time
- ☐ B. Increasing work force
- ☒ C. Add shift
- ☐ D. None of the above

55. What is the role of emotional intelligence in leadership? \*

1 point

- ☐ A. It is irrelevant to leadership effectiveness
- ☐ B. It helps leaders connect and empathize with others
- ☐ C. It is hindrance to making tough decisions
- ☐ D. It fosters a culture of fear and intimidation

56. Participative leadership has which of the following characteristics? \*

1 point

- ☐ A. Believe success arises from leaders and staff working together
- ☐ B. Employs a clear chain of command
- ☐ C. Takes the view that rewards and punishment motivate staff
- ☐ D. Seeks to involve staff in the decision making process

22. Productivity can be improved by ★ 1 point

- ☐ A. Increasing inputs while holding outputs steady
- ☐ B. Decreasing outputs while holding inputs steady
- ☐ C. Decreasing inputs while holding outputs steady
- ☐ D. Increasing inputs and outputs in the same proportion

23. A foundry produces circular utility access hatches. Currently, 160 covers are produced in a 10-hour shift. If labor productivity can be increased by 25%, it would then be ★ 1 point

- ☐ A. 10 covers/hr
- ☐ B. 20 covers/hr
- ☐ C. 25 covers/hr

8. The fill amount of bottles of soft drink has been found to be normally distributed with a mean of 2.0 liters and a standard deviation of 0.50 liter. Bottle that contain less than 1.90 liters can make the manufacturer subject to penalty by the state office of consumer affairs whereas bottles that have a net content above 2.10 liters may cause excess spillage upon opening. What is the probability that a randomly selected bottle will contain below 1.90 liters? \* 1 point

- ☐ A. 0.421
- ☐ B. 0.046
- ☐ C. 0.546
- ☐ D. 0.499

9. A fund manager tries to convince you to invest in their fund by showing you the annual returns over the last five years as follows: 10%, 20%, 30%, 12%, and 105. What is the average return per year? \* 1 point

- ☐ A. 21.04%
- ☐ B. 18.18%
- ☐ C. 19.20%
- ☐ D. 16.15%

10. The production manager at a textile mill believes that a new machine producing cloth is not working according to the company's specifications. \* 1 point

41. Meselech is well-known in her organization for her attendance.

\* 1 point

Everyone notices that she arrives at work early and doesn't mind spending her weekend completing extra work assigned to her. Her supervisor is very pleased with her and always rates her extremely high on her performance appraisal scores regardless of the criteria. This performance appraisal problem can be identified as:

- ☐ A. Strictness
- ☐ B. Leniency
- ☐ C. Halo effect
- ☐ D. Horns effect

42. Which of the following are the five process groups in project management?

\* 1 point

- ☐ A. Initiating, planning, executing, monitoring, and controlling
- ☐ B. Initiating, planning, executing, monitoring, and closing
- ☐ C. Initiating, scoping, executing, monitoring, and closing
- ☐ D. Initiating, planning, executing, testing, and closing

43. The project Manager must ensure that it develops appropriate trade off/s as

\* Indicates required question

Consider the following information and answer the proceeding 51, and 52 questions

A farmer has 45 hectares of land. Each hectare can be planted with wheat or corn. Only 100 workers and 120 quintals of fertilizers are available. Planting a hectare of wheat requires 3 workers and 2 quintals of fertilizers, and planting a hectare of corn requires 2 workers and 4 quintals of fertilizers. The profit from each hectare is birr 2000 for wheat and birr 3000 for Corn.

Formulation

Let  $X_1$  = hectares of  
land allocated to wheat

$X_2$  =  
hectares of land allocated to Corn

$$\text{Max}Z = 2000x_1 + 3000x_2$$

- ☐ C. The emphasis on employee wellness programs
- ☐ D. The importance of developing cross-functional teams

37. A process of increasing knowledge, skills & capabilities of people at work is referred as: \* 1 point

- ☐ A. Performance appraisal,

☐ B. Employee development

25. A job shop is an example of; \*

- ☐ A. Repetitive process
- ☐ B. Continuous process
- ☐ C. Intermittent process
- ☒ D. Line process

26. A newly formed Artificial Intelligence Institute (All) has five trainers available in its computer labs to provide training sessions to intelligent staff. Assume that the capacity of the system is 1900 trainees per semester and the utilization is 90%. If the number of trainees who actually got their orientation session is 1500, what is the efficiency of the system?

- ☐ A. 90%
- ☐ B. 127%
- ☐ C. 5%
- ☐ D. 79%

27. XYZ Engineering Corporation has the following tasks that are necessary \* 1 point  
to manufacture component part Q-3 used to be assemble in a war planes,  
as shown below:

If the required number of units to be produced per day and time available per day are 200 units and 1 hour respectively, using a primary rule of largest

98. Which of the following is NOT a goal of transaction processing systems? \* 1 point

- ☐ A. Capture, process, and store transactions
- ☐ B. Produce a variety of documents related to routine business activities
- ☐ C. Reduce manual effort associated with processing business transactions
- ☒ D. Produce standard reports used for management decision making

99. Which of the following statements, about the use of decision support systems, is true? \* 1 point

- ☐ A. They are applied only to the choice phase of the problem-solving process.
- ☐ B. They are only applied to frequent, recurring problems.
- ☐ C. They are only applied to highly-structured problems
- ☐ D. They assist decision makers at all levels within the organization.

100. Management information systems usually: \* 1 point

- ☐ A. Serve managers interested in weekly, monthly, and yearly results, not day-to-day activities.
- ☐ B. Help managers make decisions that are unique, rapidly changing, and not easily specified in advance.
- ☐ C. Provide managers with a generalised computing and telecommunications

☐ D. Help managers deal with a wide range of problems.
